patterned pvc ceiling film

Product Description

Packing In Roll PVC Decorative Film Non-toxic Anti-Flame Moisture-proof

Product Description:

PVC Foil

Our PVC foil is made from Polyvinyl Chloride (PVC), a durable, flexible and easy-to-process synthetic plastic material. It is available in a wide range of colors, patterns and textures, perfect for mimicking the look of natural materials like wood, stone, fabric or metal. It is an cost effective alternative to these materials, and can be applied to different surfaces, like doors, cabinets, walls, and more.

Our PVC foil is renowned for its durability and strength, making it a popular choice in high-traffic areas. It's as easy to maintain as weekly wipe down with a moist cloth and is much more affordable than natural materials, so you can get an upscale look without incurring the related expenses. The large array of styles and finishes also makes it possible to modify to match your project specifications and preferences. PVC foil is commonly used in residential and commercial setting for applications like kitchen cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

Technical Parameters:

When it comes to the **thickness** of it, the range varies from 0.1mm to 0.5mm.

In terms of **width**, it offers 1260mm and 1400mm respectively.

You can chose the most appropriate **length** for yourself from the inventory that goes from 100m to 400m per roll.

We have a wide selection of **designs** such as *wood grain, solid color, marble, brick and many more.*

You can also find long-lasting **surface treatments** like matt, super matt, embossed, high gloss and soft touch.

In addition, we provide **OEM and ODM** services.

Applications:

There are five different processes for different applications. The first one is Membrane Press(vacuum press), which has a thickness of 0.20mm to 0.50mm, and widths of 1260mm and 1400mm with lengths of 100 to 300m/roll. This process is usually applied for covers on MDF, particleboard, wooden board, fiberboard, etc, for doors, kitchen cabinet, wardrobe, furniture, etc. Cover embossed board covers five surfaces at the same time.

Wrapping Profiles has a thickness of 0.12mm to 0.18mm, widths of 40mm to 1260mm and lengths of 300 to 800m/roll. It is used for covering existing profiles such as wood profile, aluminum profile, PVC profile, etc, for door frames, window sills, base channels, PVC ceilings and more.

Cold Laminating has a thickness of 0.12mm to 0.20mm, widths of 1240 to 1260mm and lengths of 300 to 500m/roll. It can cover all kinds of flat panels, like wood panel, steel panel, aluminum panel and PVC panel, mainly used for doors and furniture production.

In addition, the Hot Laminating process has a thickness of 0.16mm to 0.30mm, widths of 1260mm and lengths of 200 to 300m/roll. This process is used for covers on PVC panel, steel panel, aluminum panel, which are applied for doors, skirting and more.

Last but not least, Self-adhesive has a thickness of 0.10mm to 0.20mm, widths of 600mm/1220mm and lengths of 5 to 50m/roll. This process is usually used for furniture and indoor decorations.
