Product Description

Embossed Surface PVC Decorative Film for Vacuum Membrane Press 3000m/model MOQ

Product Description:

Our **PVC foil** is primarily made from **Polyvinyl Chloride (PVC)**, a synthetic plastic material that is known for its durability, flexibility, and ease of processing. It is available in a wide range of colors, patterns, and textures.

It can imitate the look of natural materials such as *wood, stone, fabric, or metal*. Plus, it is a cost-effective alternative providing a *high-quality aesthetic*. Our foil can be applied to a variety of surfaces, including doors, cabinets, furniture, walls. It adheres well to different substrates and can be used in various areas indoors.

The **durability** of Realsun Deco PVC foil makes it especially suitable for high-traffic locations. It is simple to maintain, usually just requiring a wipe down once per week with a damp cloth. Moreover, it is more cost-effective than using natural materials for upscale aesthetics, and manufacturers offer a large range of styles and finishes to enable customization according to project specifications and personal design preferences.

Decorative PVC foil is commonly used in *residential and commercial settings* for applications such as *kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more*.

Technical Parameters:

Our products can achieve a wide range of thickness--from 0.1mm to 0.5mm. They come in two widths--1260mm and 1400mm, and can length ranging from 100 to 400m/roll. Regarding design, we provide various styles such as wood grain, solid color, marble, and brick, and various surface treatments like matt, super matt, embossed, high gloss, and soft touch. Additionally, we are capable of offering OEM or ODM service.

Applications:

The type of process for an application can vary. Here is an overview of five process methods each made for different purposes.

Membrane Press(vacuum press) is mainly used for covering MDF, particleboard, wooden board or fiberboard. This process is often used for doors, kitchen cabinets, wardrobes and furniture, and can cover embossed boards and five surfaces at one time. The thickness is 0.20-0.50mm, width 1260mm or 1400mm, and length 100-300m/roll.

Wrapping Profiles enables cover on all kinds of profiles like wood, aluminum, and PVC for door frames, window sills, base channels and even PVC ceilings. This process has a thickness of 0.12-0.18mm, width 40mm-1260mm and length 300-800m/roll.

Cold Laminating is used to cover on wood panels, steel panels, aluminum panels or PVC panels for doors and furnitures. Its thickness is 0.12-0.20mm, width 1240-1260mm and length 300-500m/roll.

For Hot Laminating, the purpose of this process is to be applied on PVC panels, steel panels and aluminum panels for doors and skirting. It has a thickness of 0.16-0.30mm, width 1260mm and length 200-300m/roll.

Self-adhesive technology applies onto all smooth surfaces for furniture and interior decorations. It has a thickness of 0.10-0.20mm, width 600mm/1220mm and length 5-50m/roll.
