- Service: OEM, ODM
- Width: 1260mm, 1400mm
- Material: PVC
- Highlight: **non toxic polyvinyl chloride film ,
pvc decorative foil moisture proof,
non toxic pvc decorative foil**

Product Description

Non-toxic Polyvinyl Chloride Sheet Perfect for Packaging Anti-Flame and Moisture-proof

Product Description:

Our PVC foil is mainly comprised of Polyvinyl Chloride (PVC), a durable, flexible, and easy-to-process synthetic plastic material. The wide range of colors, designs, and textures of our PVC foil makes it a great cost-effective alternative to natural materials like wood, stone, fabric, or metal. PVC foil's adhesion to various substrates and its wide application in interiors make it a sought-after material. It is used in high-traffic areas because of its resilience and strength to deterioration and is easy to maintain with just regular wiping and cleaning. Decorative PVC foil is an affordable option when compared to natural materials, and it can be customized to fit any specification or design preference. Our PVC foil can be used for doors and cabinets, furniture, wall paneling, retail displays, and much more in both residential and commercial settings. Get the look of natural materials without spending a fortune!

Technical Parameters:

The thickness range of the product is from 0.1mm to 0.5mm. The product is in roll form with widths of 1260mm and 1400mm, and the length of the roll can be up to 400 meters.

The design are various with wood grain, solid color, marble, brick and other aesthetics to choose from. The surface treatment of the product includes matt, super matt, embossed, high gloss and soft touch.

The company is able to provide OEM and ODM service for the product.

Applications:

Different Process Method for Different Applications:

Membrane Press (vacuum press): With a thickness of 0.20mm to 0.50mm, a width of 1260mm or 1400mm and a length of 100-300m/roll, this allows for application on cover on MDF, particleboard, wooden board, fiberboard, etc., for door, kitchen cabinet, wardrobe and furniture, and cover embossed board with the capacity to cover all five surfaces at the same time.

Wrapping Profiles: This involves a thickness of 0.12mm to 0.18mm, a width of 40mm to 1260mm, and a length of 300-800m/roll, enabling application on all kinds of profiles including wood profile, aluminum profile, and PVC profile, for door frames, window sills, base channels, and PVC ceilings.

Cold Laminating: This entails a thickness of 0.12mm to 0.20mm, a width of 1260mm to 1260mm, and a length of 300-500m/roll, which can cover all kinds of flat panels such as wood panel, steel panel, aluminum panel, and PVC panel, for doors and furniture.

Hot Laminating: The thickness of 0.16mm to 0.30mm, a width of 1260mm, and a length of 200-300m/roll enable it to be used for PVC panel, steel panel, and aluminum panel, applied for doors, skirting and so on.

Self-adhesive: With a thickness of 0.10mm to 0.20mm, a width of 600mm and 1220mm, and a length of 5-50m/roll, this process can be used on any smooth surface for furniture and indoor decorations.
