- Material: PVC
- Length: 100m-400m
- Highlight: **moisture resistant pvc decorative film,  
mdf doors pvc interior film,  
mdf doors pvc decorative film**

## Product Description

### Product Description:

Our *pvc foil* is primarily made from Polyvinyl Chloride (PVC), a synthetic plastic material known for its durability, flexibility, and ease of processing. It is available in a wide range of colors, patterns, and textures, making it look like natural materials like wood, stone, fabric, or metal, but at a more cost-effective price.

The foil can be applied to a variety of surfaces such as doors, cabinets, walls, and furniture. Its high durability makes it ideal for high-traffic locations with little upkeep once it is placed. Requiring just a week wiping with a moist cloth, it is simple to maintain. The affordability of the foil is one of its main benefits, creating upscale aesthetics without incurring the related expenses.

A large range of styles and finishes are available from manufacturers, enabling modification to meet project specifications and personal design preferences. It is commonly used in residential and commercial settings for applications such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

### Technical Parameters:

The thickness for our products range from 0.1mm to 0.5mm and the width from 1260mm to 1400mm. The length of the roll starts from 100m and reaches up to 400m. Additionally, there are hundreds of wood grain designs available for customers to choose from. Moreover, the surfaces of the rollers can be treated in various styles, including Matt, Super matt, embossed, high gloss, and soft touch. We also offer professional OEM, ODM and customized services.

### Applications:

Product Description:

Our PVC foil is comprised of Polyvinyl Chloride (PVC), an artificial plastic material renowned for its durability, flexibility and ease in processing.

This PVC foil comes in a variety of colors, patterns and textures. It can give off a realistic appearance of natural materials such as wood, fabric, stone and metal. At the same time, it's a cost-efficient substitute.

The foil can be used on various surfaces including but not limited to, doors, cabinets, furniture, and walls. It sticks on different substrates as well, and can be utilized for various purposes in the interior. Realsun Deco PVC foil is renowned for its unraveling resistance and strength, making it widely used in high-traffic areas.

This PVC foil demands minimal maintenance after installation. Generally easy to maintain, it only requires occasional wiping down with a damp cloth.

The main advantage this foil has over the natural materials is its low-cost. It enables an elegant design at a fraction of the price. Also, there are a wide array of styles and finishes available for customers to choose from to suit their project specifications and preferences. Decorative PVC foil is usually applied onto residential and commercial objects such as kitchen and bathroom cabinets, door panels, wall coverings, furniture surfaces, retail shelves, and more.

Technical Parameters:

The thickness of our foil ranges from 0.1mm to 0.5mm. The width is either 1260mm or 1400mm, and length can be up to 400m roll. Wood grain, Solid colors, Marble, Brick and the likes, is applied on the foil, depending on the surface treatment. The surface treatment includes Matt, Super matt, embossed, high gloss, soft touch and more. We also provide **OEM**, **ODM** and **Customized** services.

Application:

We employ different methods to apply the foil coating to different applications. Membrane press (vacuum press) is done with a thickness of 0.20-0.50mm, width of 1260mm and 1400mm and length of 100-300m/roll. It is used for covering MDF, particleboard, wooden board, fiberboard, etc, and used for doors, kitchen cabinet, wardrobe, furniture, etc. Wrapping profiles consist of thickness of 0.12-0.18mm, width of 40mm-1260mm and length of 300-800m/roll. Cold laminating has a thickness of 0.12-0.20mm, width of 1240-1260mm and length of 300-500m/roll. Hot laminating has a thickness of 0.16-0.30mm, width of 1260mm and length of 200-300m/roll, and Self-adhesive has a thickness of 0.10-0.20mm, width of 600mm/1220mm and length of 5-50m/roll.

### Customization:

Wood Grain PVC Film

### Support and Services:

Wood Grain PVC Film Technical Support and Service

We provide comprehensive technical support and service for our Wood Grain PVC Film products. Our experienced staff is always available to answer any technical questions or provide any assistance needed. We offer a variety of services, including product selection and troubleshooting, installation and maintenance, and product testing.

We also offer a full range of after-sales services, such as warranty repairs, spare parts supply, and technical advice. We are committed to providing the highest quality of customer service, and will do our utmost to ensure that our customers are satisfied with our products and services.

### **Packing and Shipping:**

#### Wood Grain PVC Film Packaging and Shipping

Wood Grain PVC Film is packaged in coils. All coils are wrapped with stretch film and then placed on wooden pallets. The pallets are then shrink-wrapped to ensure the safe delivery of the product.

Shipping is usually done by freight carriers. The freight carrier is responsible for loading the coils onto their truck, shipping the product, and unloading the coils at the destination. For orders outside of the country, shipping is usually done by air freight.
