Product Description

Product Description:

Our PVC foil is primarily made from Polyvinyl Chloride (PVC), which is a synthetic plastic material known for its durability, flexibility, and ease of processing. It is available in a wide range of colors, patterns, and textures and can mimic the look of natural materials such as wood, stone, fabric, or metal. It is the perfect cost-effective alternative to these materials while still retaining a great look.

Our pvc foil is immensely versatile and can be applied to many surfaces such as doors, cabinets, furniture, and walls. It adheres well and can be used in a number of interior areas. Additionally, it is renowned for its durability, making it perfect to use in high-traffic locations. It is also easy to maintain and with a simple weekly cloth wipe down, it can remain in great condition for a long time.

The affordability of pvc decorative foil in comparison to natural materials is one of its main benefits, allowing you to create great aesthetics without the expense. It is also easy to modify as a vast range of styles and finishes are available from manufacturers, enabling you to customise it to your own project specifications and personal design preferences.

Decorative pvc foil is used in a whole range of settings, from residential to commercial. It can be used for kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and much more.

Technical Parameters:

We offer a wide range of thickness options, from 0.1mm to 0.5mm. Our widths are 1260mm and 1400mm, and we also have a variety of lengths available, from 100 to 400m roll. We make sure to offer a range of design choices, with hundreds of wood grain designs to choose from. To ensure complete customer satisfaction, we offer several surface treatments, such as matt, super matt, embossed, high gloss and soft touch. Furthermore, we provide OEM, ODM and customized services.

Applications:

Product Description

Our PVC foil is comprised of Polyvinyl Chloride (PVC), an artificial plastic material renowned for its durability, flexibility and ease in processing.

It is available in a variety of colors, patterns and textures. It is able to imitate the look of natural materials such as wood, fabric, stone and metal, yet at a fraction of the cost.

It can stick on different substrates and can be applied for various purposes in the interior, including doors, cabinets, furniture and walls. Highly resistant to unraveling and strength, making it perfect for high-traffic areas.

Maintenance can be simple and minimal; simply wipe down with a damp cloth every occasionally. The PVC foil is ideal for artificial furniture due to its cost-efficiency.

The foil's flexibility also allows for modifications to match project specifications and personal design preferences. It is typically used in residential and commercial objects such as kitchen and bathroom cabinets, door panels, wall coverings, furniture surfaces, retail shelves, and more.

Technical Parameters

Thickness: 0.1mm to 0.5mm
 Width: 1260mm and 1400mm
 Length: 100 to 400m roll
 Design: Wood grain, Solid color, Marble, Brick and other designs
