- Highlight: **long lasting wood grain pvc film ,
1400mm decorative pvc foil,
1400mm wood grain pvc film**

Product Description

Long lasting and Versatile Wood Grain PVC Film for Cabinets 1400mm Width for Vacuum Press

Product Description:

Advantages of PVC Foils

Our pvc foil is primarily made from Polyvinyl Chloride (PVC), a synthetic plastic material that is known for its durability, flexibility, and ease of processing. It is available in a wide range of colors, patterns, and textures so it can look like natural materials such as wood, stone, fabric, or metal. As a result, we are capable of providing an economical alternative to these materials while still maintaining high-quality aesthetics.

Our pvc foil can be used on a variety of surfaces, including doors, cabinets, furniture, walls, and more. It is determined to last for years because of its resilience to deterioration and strength; small wonder why it is commonly used in high-traffic locations. Additionally, it requires little upkeep once it is placed and usually just needs to be wiped down with a moist cloth once a week.

PVC decorative foil is cost-effective in comparison to natural materials, allowing people to create upscale aesthetics without incurring too many expenses. Moreover, a large range of styles and finishes are available from manufacturers so you can modify it to meet personal design preferences. Eventually, it is mostly used in residential and commercial settings for applications like kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

Technical Parameters:

The thickness of our products range from 0.1mm to 0.5mm. Customers have the choice between two widths: 1260mm and 1400mm. It can also be purchased in lengths ranging from 100m to 400m rolls. We offer hundreds of wood grain designs that suit the customers' specific needs. There are different surface treatments to choose from such as matt, super matt, embossed, high gloss, and soft touch. Moreover, our company provides OEM, ODM, and customized services.

Applications:

Our PVC Foil is comprised of Polyvinyl Chloride (PVC), an artificial plastic material renowned for its durability, flexibility and ease in processing. It can come in a variety of colors, patterns and textures that can perfectly imitate the look of natural materials such as wood, fabric, stone, and metal, enabling customers to have an elegant design without costing an arm and a leg. PVC foil is widely used for its durability and strength in high-traffic areas and can be used on various surfaces including but not limited to, doors, cabinets, furniture, and walls. Moving forward, PVC foil demands minimal maintenance after installation and only requires occasional wiping down with a damp cloth.

The technical parameters of our PVC foil are as follows: Thickness: 0.1mm to 0.5mm, Width: 1260mm and 1400mm, Length: 100 to 400m roll, Design: Wood grain, Solid color, Marble, Brick and other designs, Surface treatment: Matt, Super matt, embossed, high gloss, soft touch, Service: OEM, ODM, Customized.

Different methods are employed to apply the film coating for different applications such as Membrane Press (vacuum press), Wrapping Profiles, Cold Laminating, Hot Laminating, and Self-adhesive. These methods have different parameters such as thickness, width, and length. For example, Wrapping Profiles has thickness of 0.12-0.18mm, width of 40mm-1260mm and length of 300-800m/roll.

Customization:

Wood Grain PVC Film

Brand Name: **Realsun Deco**
