0.5mm decorative pvc foil,
0.1mm wood grain pvc film

Product Description

Embossed Wood Effect PVC Film with Real Wood Touch 0.1mm-0.5mm Thickness

Product Description:

Our PVC foil is made primarily from **Polyvinyl Chloride (PVC)**, a synthetic plastic material renowned for its **durability, flexibility, and ease of processing**. It is available in numerous **colors, patterns, and textures**, allowing it to mimic the look of natural materials like wood, stone, fabric, or metal at a more cost-effective price. PVC foil can be applied to various surfaces, such as doors, cabinets, furniture, walls, etc. It is resistant to **deterioration** and offers high strength, so it is frequently used in areas with high-traffic. The maintenance needed for PVC foil is also minimal; it can simply be wiped down with a moist cloth once a week. Furthermore, PVC foil has a relatively low cost compared to natural materials, helping to create upscale aesthetics without incurring the related expenses. There is also a large selection of styles and finishes provided by manufacturers for customization according to project specifications and personal design preferences. In conclusion, PVC foil is commonly used for a variety of residential and commercial purposes like kitchen cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

Technical Parameters:

Are you looking for the perfect material for your project? Look no further, our products come in a range of thicknesses & widths. The thickness range from 0.1mm to 0.5mm while the width ranges from 1260mm to 1400mm. Our lengths come in a roll of 100 to 400m. Plus, we have many colorful and beautiful wood grain designs for you to choose from. Our surface treatments come in matt, super matt, embossed, high gloss, and soft touch. We are also able to provide OEM, ODM, and Customized services for our customers.

Applications:

Product Description

Our PVC foil is comprised of Polyvinyl Chloride (PVC), an artificial plastic material renowned for its durability, flexibility and ease in processing.

Our PVC foil comes with a variety of colors, patterns and textures. It can effortlessly imitate the look of natural materials such as wood, fabric, stone and metal, while providing a cost-efficient substitute.

Our foil can be used on various surfaces including but not limited to, doors, cabinets, furniture, and walls. It can stick on different substrates and can be applied for various purposes in the interior.

Realsun Deco PVC foil is well-thought as a reliable material because of its resistance from unraveling and strength. That is why it is widely used in high-traffic areas.

Our PVC foil demands minimal maintenance after installation. It is fairly easy to maintain and only requires occasional wiping down with a damp cloth.

Our PVC foil's main advantage is its low-cost, in comparison to natural materials, which makes it possible to have an elegant design without costing an arm and a leg.

PVC foil manufacturers provide a vast array of styles and finishes, allowing customers to modify the foil to match project specifications and personal design preferences.

Decorative PVC foil is usually used in residential and commercial objects such as kitchen and bathroom cabinets, door panels, wall coverings, furniture surfaces, retail shelves, and more.

Technical Parameters

Thickness: 0.1mm to 0.5mm

Width: 1260mm and 1400mm

Length: 100 to 400m roll

Design: Wood grain, Solid color, Marble, Brick and other designs

Surface treatment: Matt, Super matt, embossed, high gloss, soft touch
