Product Description

Product Description:

Our PVC foil is primarily made from **Polyvinyl Chloride (PVC)**, a synthetic plastic material known for its **durability**, **flexibility**, and **ease of processing**. It is available in a wide range of colors, patterns, and textures, allowing for a **cost-effective** alternative to mimic the look of natural materials such as wood, stone, fabric, or metal with the same high-quality aesthetic. Realsun Deco foil can be applied to a variety of surfaces, including doors, cabinets, furniture, walls, and more, and adheres well to other substrates while still being able to withstand heavy traffic. Moreover, it is simple to maintain, usually just requiring a weekly wipe with a wet cloth. Cost-effectiveness is one of its main benefits, enabling the creation of upscale aesthetics without incurring the related expenses. A wide range of styles and finishes are available, so as to meet project specifications and personal design preferences. Decorative pvc foil is commonly used in residential and commercial settings for applications such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

Technical Parameters:

The wood grain design comes in many different style, with the thickness ranging from 0.1mm up to 0.5mm. The width is available in two different sizes, 1260mm and 1400mm. It comes in roll length between 100 to 400m. In terms of surface finish, you can choose from Matt, Super matt, embossed, high gloss and soft touch. Furthermore, OEM, ODM and customized service are also provided.

Applications:

Our PVC foil is comprised of Polyvinyl Chloride (PVC), an artificial plastic material renowned for its durability, flexibility and ease in processing. With a variety of colors, patterns and textures, it can effortlessly imitate the look of natural materials such as wood, fabric, stone and metal while providing a cost-efficient substitute.

Realsun Deco PVC foil is widely used in high-traffic areas as it is thought to be reliable because of its resistance from unraveling and strength. Additionally, it demands minimal maintenance after installation. It is fairly easy to maintain and only requires occasional wiping down with a damp cloth.

PVC foil is a cost-effective material in comparison to natural materials, which makes it possible to have an elegant design without costing an arm and a leg. The foil is available in various styles and finishes, allowing customers to modify the foil to match project specifications and personal design preferences. Decorative PVC foils are usually used in residential and commercial objects such as kitchen and bathroom cabinets, door panels, furniture surfaces, wall coverings, and retail shelves.

When it comes to technical parameters, our foil has a thickness range of 0.1mm - 0.5mm, a width of 1260mm and 1400mm and a length of 100 - 400m roll. We also offer a diverse selection of wood grain, solid color, marble, brick and other designs with matt, super matt, embossed, high gloss, soft touch surfaces. Moreover, our OEM, ODM and customization services are provided.

Depending on the application, different methods can be employed to apply the PVC foil. These include the membrane press, wrapping profiles, cold laminating, hot laminating and self-adhesive. These methods are used for covering various materials such as MDF, particleboard, wooden board, fiberboard, wood profiles, aluminum profiles, PVC profiles, flat panels, PVC panel, steel panel, aluminum panel, etc.

Customization:
