- Packing: Pack In Roll With Foam Sheet, Kraft Paper And Plastic Sheet
- Highlight: **Mdf Board Marble PVC Film,
Marble PVC Film 400m,
Mdf Board marble effect film**

Product Description

Product Description:

Our Durable and Stylish PVC Foil

Our PVC Foil is primarily made from Polyvinyl Chloride (PVC) - a synthetic plastic material known for its durability, flexibility, and ease of processing. It is available in a wide range of colors, patterns, and textures that can imitate the look of natural materials such as wood, stone, fabric, or metal and provide a cost-effective alternative while maintaining a high-quality aesthetic.

Our PVC foil is extremely versatile and can be applied to various surfaces including doors, cabinets, furniture, walls and more as it adheres well to different substrates. This allows it to be used in multiple settings both indoors and outdoors. It is renowned for its strength and resilience to deterioration and is therefore frequently used in high-traffic locations.

Our product requires little maintenance as it only needs to be wiped down once a week with a moist cloth. It is an affordable solution especially in comparison to natural materials as it gives the environment an elegant look without incurring the related expenses.

Manufacturers provide a large range of styles and finishes for modification to meet project specifications and personal design preferences. It is commonly used in residential and commercial settings for applications such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

Technical Parameters:

About Our Product

We offer a wide range of products that vary in thickness, width, length, design, and surface treatment. Our products' thickness ranges from 0.1mm - 0.5mm, width from 1260mm - 1400mm, and length from 100m - 400m roll.

Our design includes wood grain, solid color, marble, brick, and more. In addition, we also offer a variety of surface treatments including matt, super matt, embossed, high gloss, and soft touch.

Moreover, we provide excellent OEM and ODM services for our customers.

Applications:

Membrane Press (vacuum press) is suitable for covering on MDF, particleboard, wooden board, fiberboard, etc, mainly for doors, kitchen cabinet, wardrobe, furniture, etc. What's more, it is able to cover embossed board and five surfaces at same time. The thickness of membrane ranges from 0.20 to 0.50mm with width of 1260mm or 1400mm, and length of 100-300m/roll.

For wrapping profiles, like wood profile, aluminum profile, PVC profile, etc., thickness of the membrane is 0.12-0.18mm, width 40-1260mm, length 300-800m/roll. These applications including door frame, window sill, base channel, PVC ceiling, etc.

When doing cold laminating, the thickness can be 0.12-0.20mm, width 1240-1260mm, length 300-500m/roll. It is suitable for covering on all kinds of flat panels, such as wood panel, steel panel, aluminum panel, PVC panel, etc., and enables doors and furniture to look better.

In the process of hot laminating, the membrane should have thickness of 0.16-0.30mm, width 1260mm, and length of 200-300m/roll.

Used for covering on PVC panel, steel panel, aluminum panel, it is mainly applied to doors, skirting, etc.

The thickness of membrane for self-adhesive is 0.10-0.20mm, width 600mm/1220mm, and length 5-50m/roll. It can be put on any smooth surface for furniture and indoor decorations.

Customization:

Customize Marble PVC Film
