Product Description:

PVC Foils
Our PVC foils are primarily made from Polyvinyl Chloride (PVC), a synthetic plastic material known for its durability, flexibility, and ease of processing. This gives them many advantages over traditional alternatives.
Appearance

Our foils come in a huge range of colors, textures, and patterns. They can mimic the look of natural materials such as wood, stone, fabric, and metal, delivering an upscale aesthetic at a fraction of the cost of these materials.
Versatility and Durability

PVC foils are suitable for a wide range of applications, including furnitre, walls, cabinets, and more. The foil adheres well to different substrates and it is resilient and strong, making it suitable for use in high-traffic locations.
Maintenance and Cost

Maintaining our foil requires very little effort - just a weekly wipe down with a moist cloth will suffice. Cost is kept low due to affordable material costs, making it a great option for residential and commercial settings.
Modification and Application

Manufacturers offer a large range of styles and finishes for modification purposes, so you can tweak the foil to meet your project's specifications or design preferences. Our PVC foils can be used for a variety of purposes, such as wall paneling, interior doors, kitchen cabinets, furniture surfaces, and more.

Technical Parameters:

Our PVC film is available in various thickness ranging from 0.1mm to 0.5mm. Generally, the accessible width for selection are 1260mm and 1400mm options. As for the length requirement, we provide customers with flexible choices. The user may select between 100 to 400 meters / roll. In terms of design, the product offers patterns like Wood grain, Solid color, Marble, Brick and so on. Furthermore, a series of surface treatment processes are available, including matt, super matt, embossed, high gloss, soft touch.
Moreover, we offer the OEM and ODM services to meet the individual needs of different customers.

Applications:

Membrane Press (vacuum press) is used for covering MDF, particleboard, wooden board, fiberboard, etc, such as doors, kitchen cabinet, wardrobe, furniture, etc. It can cover embossed board and five surfaces at the same time. The thickness varies from 0.20 to 0.50mm, and the width is from 1260mm and 1400mm. The length of the roll is from 100 to 300m.
Wrapping Profiles is used for covering all kinds of profiles such as wood profile, aluminum profile, PVC profile, etc. It could be applied to door frame, window sill, base channel, PVC ceiling, etc. Its thickness ranges from 0.12 to 0.18mm, width from 40 to 1260mm, and length of the roll is from 300 to 800m.
Cold Laminating is used for covering all kinds of flat panels including but not limited to wood panel, steel panel, aluminum panel, and PVC panel, etc. It could be applied to doors and furniture. The thickness ranges from 0.12 to 0.20mmm, width from 1240mm to 1260mm, and the length of the roll is from 300 to 500m.
Hot Laminating is used for covering PVC panel, steel panel, aluminum panel for doors, skirting, etc. Its thickness varies from 0.16 to 0.30mm, width 1260mm, and the length of roll ranges from 200-300m.
Self-adhesive is suitable for furniture and indoor accessories. Its thickness varies from 0.10 to 0.20mm, width from 600mm/1220mm, and it's available in rolls with length from 5 to 50m.

Customization:

Customized Marble PVC Film from Realsun Deco
Realsun Deco's Marble PVC Film is a high-quality product from Foshan, China, perfect for wall panel decoration. It comes in two widths of 1260mm or 1400mm and a thickness range of 0.10mm to 0.5mm, with a minimum order quantity of 3000m per model. The surface can be glossy, matte, embossed, textured, or soft touch. It is a great choice for PVC film for wall panel, 0.25mm PVC film, and PVC printable film.
