Product Description:

Our PVC foil is made of Polyvinyl Chloride (PVC) – a durable and flexible synthetic plastic material which is easy to process. It is available in a broad spectrum of colors and textures, along with patterns that are able to mimic the look of natural materials such as wood, stone, fabric or metal. Therefore, it is a cost-effective alternative to these materials while still preserving a high-quality visual effect. The foil is versatile, allowing it to be applied to various surfaces such as doors, cabinets, walls, furniture and more. It forms a strong bond with different substrates and it can be used to decorate various parts of a home interior. Thanks to its sturdiness, it is also frequently used in places with high traffic.

Maintaining the foil is rather easy. weekly wiping with a damp cloth should be enough to keep it looking new. Additionally, it is also an economical choice compared to natural materials as it enables people to create an sophisticated look without the associated costs. What's more, there is a wide range of styles and finishes supplied by manufacturers, which make it possible to accommodate project requirements and individual design tastes. This type of PVC foil is often used in residential and commercial settings for many purposes such as kitchen and bathroom cupboards, wall panelling, interior doors, furniture, retail displays and more.

Technical Parameters:

We offer **PVC laminated foil** with a **wide range of sizes and options**. The thickness of the laminated foil ranges from **0.1mm to 0.5mm**. Available widths for the foil include **1260mm and 1400mm**. The length of the foil can vary from **100m to 400m per roll**.

You can choose from different **designs such as wood grain, solid color, marble, brick and many others** . Additionally, the surface treatment options include **matt, super matt, embossed, high gloss and soft touch**.
