- Highlight: **ODM High Gloss PVC Film,
1260mm PVC Film For Furniture,
ODM PVC Film For Furniture**

Product Description

Product Description:

Our **PVC foil** is primarily made from *Polyvinyl Chloride(PVC)*, a synthetic plastic material known for its durability, flexibility, and ease of processing.

Our PVC foil is available in a wide range of colors, patterns, and textures. It can mimic the look of natural materials such as wood, stone, fabric, or metal, providing a cost-effective alternative to these materials while retaining a high-quality aesthetic.

The versatility of our foil allows it to be applied to a variety of surfaces, including doors, cabinets, furniture, walls, and more. It adheres well to different substrates and can be used in different areas in interior.

Realsun Deco PVC foil is renowned for its resilience to deterioration and strength. Because of its durability, it is frequently used in high-traffic locations.

Our PVC foil requires little upkeep once it is placed. It is simple to maintain and usually just has to be wiped down once a week with a moist cloth.

The affordability of PVC decorative foil in comparison to natural materials is one of its main benefits. It makes it possible to create upscale aesthetics without incurring the related expenses.

A large range of styles and finishes are available from manufacturers, enabling modification to meet project specifications and personal design preferences.

Decorative PVC foil is commonly used in residential and commercial settings for various applications such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

Technical Parameters:

We provide pvc decorative film in various thickness, from 0.1mm to 0.5mm.

You can select from the standard width range: 1260mm and 1400mm. The length of the roll can be 100m - 400m.

There are a variety of designs, such as wood grain, solid color, marble, brick and more.

We offer various surface treatments: matt, super matt, embossed, high gloss and soft touch.

We are able to offer OEM and ODM services.

Applications:

Types of Coating Processes

The types of coating processes we offer for various applications are:

Membrane Press (vacuum press): This is used to cover MDF, particleboard, wooden board, fiberboard, etc for doors, kitchen cabinet, wardrobe or for furniture. Embossed board can be covered in a single process. Thickness ranges from 0.20-0.50mm, width 1260mm/1400mm and length ranges from 100-300m/roll.

Wrapping Profiles: Used for covering all kinds of profiles such as wood profile, aluminum profile and PVC profile for door frame, window sill, etc. thickness ranges from 0.12-0.18mm, width from 40-1260mm and length from 300-800m/roll.

Cold Laminating: Used to cover wooden panels, steel panels, aluminum panels and PVC panels for door and furniture. Thickness ranges from 0.12-0.20mm, width from 1240-1260mm and length from 300-500m/roll.

Hot Laminating: Used to cover PVC panel, steel panel and aluminum panel for doors and skirting. Thickness ranges from 0.16-0.30mm, width 1260mm and length from 200-300m/roll.

Self-adhesive: Can be put on any smooth surface for furniture and interior decoration. Thickness ranges from 0.10-0.20mm, width from 600mm/1220mm and length from 5-50m/roll.

Customization:

Realsun Deco is a brand of high gloss PVC film which is made in Foshan, China. It is a kind of glossy vinyl film, high gloss PVC foil, color rigid PVC film. The width of the PVC film ranges from 1260mm to 1400mm, and its thickness is from 0.15mm to 0.5mm.
