Product Description

Product Description:

Our PVC foil is made primarily from Polyvinyl Chloride (PVC), a strong, flexible and easy to manipulate synthetic plastic material. It comes in a variety of colors, patterns and textures, making it possible to imitate the look of natural materials such as wood, stone, fabric or metal, while being much more cost-effective and retaining a high-grade aesthetic.

Our PVC foil can be applied to numerous surfaces, such as cabinets, doors, furniture, walls, and more. It also attaches easily to different substrates while having the capacity to be employed in various rooms. Realsun Deco's PVC foil is renowned for its durability and strength, which is why it is often used in heavy-traffic areas.

Cleaning our PVC foil is simple and does not require much maintenance. Once put into place, wiping down the area with a damp cloth once a week should suffice. What makes PVC decorative foil even more attractive is that it is much more budget-friendly than natural materials and can give a more luxurious look without having to pay extra costs. In addition, PVC foil is customizable to suit your own design preferences or project specifications.

PVC decorative foil is frequently used in both residential and commercial settings for various purposes, such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture designs, retail displays, and more.
