- Application: Furniture, Door, Wall, Kitchen Cabinet, Ceiling Etc.
- Highlight: **Ceiling Panel pvc film lamination, PVC Lamination Film 300m,**

Product Description

1260mm Width PVC Lamination Roll Film with Soft Touch Surface for Ceiling Panel

Product Description:

Our pvc foil is primarily made from Polyvinyl Chloride (PVC), a synthetic plastic material that is known for its durability, flexibility, and ease of processing. It is available in an array of colors, patterns, and textures and can closely imitate the look of natural materials, such as wood, stone, fabric, or metal —promising a cost-effective alternative to these materials while still achieving an elegant visual effect. Furthermore, our pvc foil can be applied to different surfaces, such as doors, cabinets, furniture, walls, and more, and it also adheres well to various substrates. Its enduring features make it a popular choice for high-traffic locations. Not only does it require minimal maintenance —just needs to be wiped down once a week with a moist cloth— but it is also quite affordable when compared to other natural materials.

Also noteworthy is the large selection of styles and finishes available from the manufacturers, which allows for modifications to meet project specs and personal design preferences. Decorative pvc foil is commonly used in residential and commercial settings, for things such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

Technical Parameters:

We offer a range 0.1mm to 0.5mm thickness for our products. The widths available are 1260mm and 1400mm. The standard length is available in 100-400m/roll. We have many designs to choose from such as wood grain, solid color, marble, brick and so on. The surfaces can be finished in matt, super matt, embossed, high gloss, and soft touch. Customised design and OEM or ODM services are also available.

Applications:

Membrane Press (vacuum press) is used to cover on MDF, particleboard, wooden board, fiberboard, etc, for doors, kitchen cabinet, wardrobe, furniture, etc. And it can cover embossed board and five surfaces at same time. The thickness varies from 0.20-0.50mm, width from 1260mm,1400mm, and length from 100-300m/roll.

Wrapping Profiles is used to cover on all kinds of profiles including wood profile, aluminum profile, PVC profile, etc., for door frame, window sill, base channel, PVC ceiling and so on. The thickness ranges from 0.12-0.18mm, width from 40-1260mm and length from 300-800m/roll.

Cold Laminating is aimed at covering on all kinds of flat panels, such as wood panel, steel panel, aluminum panel, PVC panel, etc. for doors and furniture. The thickness varies from 0.12-0.20mm, width from 1240-1260mm and length from 300-500m/roll.

For Hot Laminating, it works on the PVC panel, steel panel, aluminum panel for doors, skirting and similar items. The thickness ranges from 0.16-0.30mm, width is 1260mm and length from 200-300m/roll.

Self-adhesive can be attached to any smooth surface for furniture and indoor decorations, with thickness from 0.10-0.20mm, width from 600mm/1220mm and length from 5-50m/roll.
