- Highlight: **0.3mm Pvc Decor Film,**
Board Lamination PVC Decor Film ,
0.3mm door lamination film

Product Description

0.3mm Lamination PVC Film For Wpc And Mdf Board Lamination

Product Description:

Advantages of RealSun Deco PVC Foil

RealSun Deco PVC Foil is a highly versatile material that is well-suited for many applications. The main component of the foil is Polyvinyl Chloride (PVC), which is a synthetic plastic material known for its durability, flexibility, and ease of processing. Our foil is available in numerous colors, textures, and patterns that can easily mimic natural materials like wood, stone, fabrics, or metal, providing a cost-effective alternative to these materials without compromising the quality of the result.

The foil is highly resilient to deterioration and wear and tear, and is often used in high-traffic locations. Moreover, it is incredibly easy to maintain as it requires little upkeep once applied. A simple weekly wiping down with a moist cloth is all that is necessary to keep it looking as good as new.

Beyond its durability and ease of maintenance, one of the main benefits of RealSun Deco PVC Foil is its affordability compared to natural materials. It enables the creation of upscale aesthetics without incurring the related expenses. Additionally, there is a wide range of styles and finishes available from manufacturers, allowing customers to modify the foil to fit their exact specifications and individual design preferences.

RealSun Deco PVC Foil is widely used for a variety of residential and commercial projects. Such projects include kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and many more.

Technical Parameters:

Our PVC film is available in various thicknesses ranging from 0.1mm to 0.5mm. It features a width of 1260mm or 1400mm and a length of 100-400m/roll. A variety of design patterns are available, such as wood grain, solid color, marble, brick and many more. Surface treatments like matt, super matt, embossed, high gloss and soft touch enables the product to show finer texture.

We also provide OEM and ODM services to meet customers' demand and satisfy their needs.

Applications:

For different applications, there are different processes. **Membrane Press (vacuum press)** is used on MDF, particleboard, wooden board, fiberboard etc. for doors, kitchen cabinet, wardrobe and furniture, with the thickness ranging from 0.20mm to 0.50mm, width of 1260mm or 1400mm, length of 100-300m/roll. This process is ideal for cover embossed board and can cover five surfaces at one time.

Wrapping Profiles covers all kinds of profiles including wood profile, aluminum profile, PVC profile, etc. It is used for door frame, window sill, base channel, PVC ceiling and more, with the thickness from 0.12mm to 0.18mm, width of 40-1260mm, length of 300-800m/roll.

Cold Laminating is used for all kinds of flat panels, including wood panel, steel panel, aluminum panel, PVC panel and so on, for doors and furniture. It's thickness ranges from 0.12mm to 0.20mm, width from 1240-1260mm, length of 300-500m/roll.

Hot Laminating is used for PVC panel, steel panel, aluminum panel for doors, skirting and more, with the thickness from 0.16mm to 0.30mm, width of 1260mm, length of 200-300m/roll.

Self-adhesive is put on any smooth surface for furniture and indoor decorations, with the thickness of 0.10-0.20mm, width 600mm/1220mm, length 5-50m/roll.
