- Highlight: **PVC Lamination Film 0.20mm, Membrane Press pvc film lamination, 0.20mm pvc lamination roll**

Product Description

1260mm Width Wood Grain PVC Lamination Film for Vacuum Membrane Press Applications

Product Description:

Our PVC Foil is primarily made of Polyvinyl Chloride (PVC), an extremely durable, flexible, and easily processed synthetic plastic material.

It is available in a wide variety of colors, patterns and textures to mimic the look of natural materials such as wood, stone, fabric, or metal, offering a cost-effective alternative with a high-quality aesthetic.

This foil can be applied to nearly any type of surface, including furniture, cabinetry, doors, walls and more, and adheres well to multiple substrates. It further provides decorations for both residential and commercial settings.

Moreover, this foil is renowned for its enduring strength and resilience to deterioration, making it ideal for high traffic areas. Additionally, maintenance can be completed quickly and simply, only needing a weekly wipe down.

The affordability of PVC Foil in comparison to natural materials allows for customization in order to meet specifications and design preferences. One can easily create high-end aesthetics without incurring the related expenses.

In short, our PVC Foil is a great choice for anyone looking for long-lasting decorations and cost efficiency.

Technical Parameters:

We provide various kinds of high-quality Aluminum Composite Panels, with thickness ranging from 0.1mm to 0.5mm, width being 1260mm and 1400mm, and length of 100-400m/roll. The designs can be wood grain, solid color, marble, brick and many more. We also offer several kinds of surface treatment, including matt, super matt, embossed, high gloss and soft touch. Furthermore, we provide OEM and ODM services.

Applications:

Different Process for different application

1. Membrane Press (vacuum press): With thickness ranging from 0.20-0.50mm, width from 1260mm, 1400mm, and length from 100-300m/roll, this process can cover on materials like MDF, particleboard, wooden board, fiberboard, etc, and is used for doors, kitchen cabinet, wardrobe, furniture, etc. Cover embossed board and cover all five surfaces at same time.

2. Wrapping Profiles: With thickness ranging from 0.12-0.18mm, width from 40-1260mm, and length from 300-800m/roll, this process can cover on all kinds of profiles including wood profile, aluminum profile, PVC profile, etc, and can be used for door frame, window sill, base channel, PVC ceiling and so on.

3. Cold Laminating: With thickness ranging from 0.12-0.20mm, width from 1240-1260mm, and length from 300-500m/roll, this process can cover on all kinds of flat panels, such as wood panel, steel panel, aluminum panel, PVC panel, etc. and can be used for doors and furniture.

4. Hot Laminating: With thickness ranging from 0.16-0.30mm, width of 1260mm, and length from 200-300m/roll, this process can cover on the PVC panel, steel panel, aluminum panel, and can be used for doors, skirting and so on.

5. Self-adhesive: With thickness ranging from 0.10-0.20mm, width from 600mm/1220mm, and length from 5-50m/roll, this process can be put on any smooth surface for furniture and indoor decorations.
