Product Description

Super Matte Embossed PVC Lamination Film For Aluminum Profile Wrapping

Product Description:

Our PVC foil is primarily made from Polyvinyl Chloride (PVC), a synthetic plastic material known for its durability, flexibility, and ease of processing. The foil is available in a wide range of colors, patterns, and textures, providing a cost-effective alternative to natural materials that still looks high-quality.

The foil can be applied to a range of surfaces such as doors, cabinets, furniture, walls, and more. It has an excellent adhesion capability and is resistant to wear and tear. Little maintenance is needed after installation, usually just wiping it down with a damp cloth once a week.

The affordability of PVC decorative foil compared to natural materials is a great benefit, making it possible to create the same upscale effects with reduced costs. The various styles and finishes that are available also help project specifications and individual design preferences to be met.

PVC decorative foil is commonly used in residential and commercial settings for features like kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

Technical Parameters:

The thickness of the product can range from 0.1mm to 0.5mm and the width be either 1260mm or 1400mm while the length can extend from 100 to a maximum of 400m/roll. We offer wide variety of design options like wood grain, solid colour, marble, brick etc. When it comes to finish, we provide matt, super matt, embossed, high gloss and soft touch. And to cap it all, we have customized OEM and ODM services.

Applications:

The processes used for different applications are varied. For example:

Membrane Press (vacuum press) is suitable for covering various types of sheets such as MDF, particleboard, wooden board and fiberboard, for doors, kitchen cabinet, wardrobe and furniture. Five surfaces can be covered at once. The thickness ranges from 0.20 to 0.50 mm, width is 1260 or 1400 mm and length is 100 to 300 m per roll.

Wrapping Profiles has the capability to cover all kinds of profiles which includes wood profile, aluminum profile and PVC profile, for use on door frame, window sill, base channel and PVC ceiling. Thicker of 0.12 to 0.18 mm, width of 40 to 1260 mm and length of 300 to 800 m per roll.

Cold Laminating is ideal for flat panels such as wood Panel, steel panel, aluminum panel and PVC panel and for doors and furniture. It comes with thickness range of 0.12 to 0.20 mm, width of 1240 to 1260 mm and length of 300 to 500 m per roll.

Hot Laminating is suitable for PVC panel, steel panel and aluminum panel for doors, skirting. It has the thickness in the range of 0.16 to 0.30 mm, width of 1260 mm and length of 200 to 300 m per roll.

Self-Adhesive is applicable for any smooth surface. It can be used in furniture and indoor decorations with thickness range from 0.10 to 0.20 mm, width of 600 or 1220 mm and length of 5 to 50 m per roll.
