Kitchen Cabinet Film Anti Scratch**

Product Description

High Glossy Anti Scratch Colorful Furniture Decorative PVC Foil for Membrane Press Kitchen Cabinet

Product Description:

Material: Polyvinyl Chloride (PVC) is the main ingredient of our PVC foil, which is a synthetic plastic that has excellent strength, flexibility and processing efficiency.

Appearance: Our PVC foil comes in a variety of colors, patterns and textures that imitate the appearance of real materials like wood, stone, metal or cloth, while remaining more affordable and having a premium feel.

Adaptability: This foil can be used on a variety of surfaces such as walls, doors, cabinets and furniture, allowing for it to be applied in various interior spaces.

Durability: Our PVC foil is highly durable and resistant to damage, making it a popular choice for areas with high foot traffic.

Maintenance: Our PVC foil is easy to maintain, only needing to be cleaned once a week with a wet cloth.

Economical: PVC decorative foil is much cheaper than natural materials and provides a sophisticated aesthetic look without the high costs.

Modification: We have a wealth of styles and finishes available, allowing for modification to make it suitable for any project requirement and individual design preference.

Application: PVC decorative foil is often used for wall paneling, furniture surfaces, interior doors, kitchen and bathroom cabinets, retail displays, and other uses in both home and commercial settings.

Technical Parameters:

We offer PVC film in a range of thickness, width and length selections to meet varied needs. The thickness can be from 0.1mm to 0.5mm. The width can be 1260mm or 1400mm. The length ranges from 100 to 400m/roll.

Our PVC film also have a wide range of designs, including wood grain, solid color, marble, brick and more. The surface treatment includes matt, super matt, embossed, high gloss, soft touch etc. We will provide OEM & ODM service to create custom solutions.

Applications:

Membrane Press (vacuum press)

This technology is used to cover MDF, particleboard, wooden board, fiberboard, etc. with a thickness of 0.20-0.50mm with a width of 1260mm and 1400mm and a length of 100-300m per roll. It is used to create doors, kitchen cabinet, wardrobe, and other furniture. Furthermore, with this pressing technique, embossed boards can be created to cover five surfaces at the same time.

Wrapping Profiles

This process is used to cover different kinds of profiles like wood profile, aluminum profile, and PVC profile with a thickness ranges from 0.12-0.18mm, a width of 40-1260mm, and a length of 300-800m per roll. It is used for door frames, window sills, base channels, PVC ceilings, and so on.

Cold Laminating

This application is used to cover various flat panels like wood panel, steel panel, aluminum panel, PVC panel, and so on, with a thickness of 0.12-0.20mm, a width of 1240-1260mm, and a length of 300-500m per roll. It can be used to cover doors and furniture.

Hot Laminating

This process is used to cover PVC panel, steel panel, aluminum panel with a thickness of 0.16-0.30mm, a width of 1260mm, and a length of 200-300m per roll. It is mainly used to cover doors, skirting, and other decorations.

Self-adhesive

This is suitable for sticking on any smooth surfaces of furniture and indoor decorations. It has a thickness of 0.10-0.20mm, a width of 600mm or 1220mm, and a length of 5-50m per roll.

Product selection assistance

Troubleshooting and problem-solving

Installation and maintenance help

Product customization

Periodic technical updates

Warranty and replacement services

Furthermore, we are available 24/7 to answer any questions, provide advice, and address any issues that may arise. We are always here to help.

Packing and Shipping:

PVC Furniture Film Packaging and Shipping:

PVC film is rolled up and sealed with an outer plastic sheet, kraft paper head, and foam protective sheet. The roll is labeled with the product name, size, weight, and other relevant information. The roll is then sealed with tape and placed on a pallet for shipping. The pallet is then shrink-wrapped for extra protection. The shipment is then shipped by sea or air.
