Product Description

1-5Color Printing PVC Membrane Foil in Rolls for Kitchen Cabinet Door Cover

Product Description:

Our **pvc foil** is made from Polyvinyl Chloride (PVC), a strong, flexible, and easy-to-process synthetic plastic. It has a premium appearance and can be used to imitate the look of real materials such as wood, stone, cloth, or metal while being more affordable. Realsun Deco PVC foil is very adaptable and can be applied to a wide range of surfaces, including walls, doors, cabinets, and furniture. Moreover, it is known for its strength and resistance to deterioration, making it a good option for high-traffic areas. Cleaning it once a week with a wet cloth is all it takes to maintain.

Decorative pvc Foil is an economical solution for interior spaces. It offers a variety of colors, patterns, and textures for customers to choose from. It is also possible to modify it to satisfy project requirements and design preferences.

It can be used in both home and a commercial setting, such as wall paneling, furniture surfaces, retail displays, and interior doors. Kitchen and bathroom cabinets might also benefit from the use of pvc decorative foil.

Technical Parameters:

We provide high quality and exquisite pvc film with diverse range of thickness, width and length. Customers can choose from the 0.1-0.5mm thicknesses, 1260mm, 1400mm widths and lengths of 100-400m per roll. Also, since our designs come in a variety of options such as wood grain, solid color, marble and brick, you have a lot of choice to pick according to your preference. Moreover, our products offer various surface treatments including matt, super matt, embossed, high gloss and soft touch, turning your vision into reality. Apart from all of these advantages, we also provide OEM and ODM services to our customers. So, please feel free to contact us if you have any inquiries or special requests.

Applications:

In addition, for safer transportation, we even provide pallet, which adds stability while shipping by either air or sea. In the coating application, we have five different processes: Membrane Press (Vacuum Press), Wrapping Profiles, Cold Laminating, Hot Laminating and Self-Adhesive. The range of thickness would vary from 0.10mm to 0.50mm, width from 40mm to 1260mm and the length of 300-800m/roll.

The PVC film is packed by roll with foam protection sheet, kraft paper head, and plastic sheet outside. It meets different requirements of the customer for practicality, like door, kitchen cabinet, wardrobe, furniture, profiles, aluminum panel, PVC panel and so on.

In addition, for safer transportation, we even provide pallet, which adds stability while shipping by either air or sea.

In the coating application, we have five different processes: Membrane Press (Vacuum Press), Wrapping Profiles, Cold Laminating, Hot Laminating and Self-Adhesive. The range of thickness would vary from 0.10mm to 0.50mm, width from 40mm to 1260mm and the length of 300-800m/roll.
