- Packaging: Rolls
- Width: 1260mm/1400mm
- Highlight: **300 Micron PVC Self Adhesive Foil,**
300 Micron embossed pvc film,
Interior Design embossed pvc film

Product Description

Product Description:

Material: Our PVC foil is made from Polyvinyl Chloride (PVC) – a synthetic plastic that is strong, flexible, and easy to process.

Appearance: PVC foil comes in a wide range of colors, patterns, and textures. It has the look and feel of real materials like wood, stone, cloth, or metal, but at a more affordable price point and with a premium appearance.

Adaptability: Our pvc foil is suitable for many different surfaces such as walls, doors, cabinets, and furniture. It can be used in various interior spaces.

Durability: Realsun Deco PVC foil is renowned for its durability and resistance to decay. It can be used in high-traffic areas without worry.

Maintenance: Because our pvc foil is installed once, you don't have to worry about spending much time on it. All you need to do is wipe it with a wet cloth once a week, and you're done.

Economical: PVC decorative foil is an economical alternative to natural materials. That means you get a sophisticated aesthetic at a fraction of the cost.

Modification: Manufacturers offer a wide variety of styles and finishes for pvc foil, so it can be modified to meet project requirements and individual design preferences.

Application: Decorative PVC foil can be used for wall paneling, furniture surfaces, retail displays, interior doors, kitchen and bathroom cabinets, and more, both for residential and commercial use.

Technical Parameters:

Our company provides specialized products with varied Thickness, Width, Length, Design, Surface treatment and service options.

The Thickness range from **0.1mm to 0.5mm**, and the Width options include **1260mm and 1400mm**. We provide length in a range of **100m to 400m per roll**.

We offer a wide variety of Design options such as Wood grain, Solid color, Marble, Brick and more.

Our Surface treatment categories include **Matt, Super matt, Embossed, High gloss, and Soft touch**.

In addition, we provide **OEM/ODM service**.

Applications:

Membrane Press (vacuum press) can cover MDF, particleboard, wooden board, fiberboard, etc, for doors, kitchen cabinet, wardrobe, furniture, etc. It even cover embossed board, and cover five surfaces at same time, with a thickness range between 0.20 to 0.50 millimetres and a length between 100 to 300 metres per roll, with a width available in 1260mm and 1400mm.

Wrapping Profiles is suitable for covering all kinds of profiles, including wood, aluminum, PVC profile, with a thickness of between 0.12mm to 0.18mm, a width between 40mm to 1260mm, and a length between 300 to 800 metres per roll. It is able to use for door frame, window sill, base channel, PVC ceiling and more.

Cold Laminating can cover all kinds of flat panels, including wood, steel, aluminum, and PVC panel, for doors furniture. It has a range of thickness between 0.12mm to 0.20mm, a width between 1240 to 1260mm, and a length between 300 to 500 metres per roll.

Hot Laminating is suitable to cover PVC panel, steel panel, aluminum panel for doors, skirting and more, with the thickness ranging from 0.16 to 0.30 millimeters, a width of 1260mm, and a length between 200 to 300 metres per roll.

Self-adhesive film has a thickness range between 0.10 to 0.20 millimeters, a width of 600mm and 1220mm, and a length between 5 and 50 metres per roll. This one is perfect for putting on any smooth surface for furniture and interior decorations.

Support and Services:

PVC Membrane Foil offers technical support and services to help you get the most out of your product. Our experienced technical support team is available to provide assistance with product selection, troubleshooting, installation, and more. We also offer regular maintenance and repair services to keep your product in peak condition. If you ever have any questions or issues with your PVC Membrane Foil,

please don't hesitate to contact us and we'll be happy to help.

Packing and Shipping:

PVC Membrane Foil Packaging and Shipping

PVC membrane foil PVC film is wrapped in rolls, with an outer plastic sheet, kraft paper head, and a foam protection sheet.

The roll should be wrapped in a plastic wrap to ensure the product is protected from moisture. The roll should then be placed in a shipping container for transportation. The shipping container should be strong enough to withstand any bumps or shocks that the package may encounter during the shipping process. The shipping container should also be labeled clearly with the company's logo, the number of products inside, and the destination address.

It is important to make sure that all the products are securely placed in the pallet and the shipping container before it is dispatched. The package should be handled with care during the entire shipping process to ensure that the product arrives safely and undamaged at its destination.
