- Highlight: **Wooden Design PVC Membrane Foil, Wooden Design PVC Membrane film, Furniture Decoration wooden pvc foil**

Product Description

Product Description:

Features of Realsun Deco PVC Foil

Polyvinyl Chloride (PVC) is the main ingredient of our pvc foil and it is a synthetic plastic with excellent strength, flexibility, and processing simplicity. Our pvc foil is available in a variety of colors, patterns, and textures which makes it look as good as real materials such as wood, stone, cloth, or metal. But at the same time, it provides affordability and maintain premium look. It is suitable for many surfaces, such as walls, doors, cabinets, and furniture. The strong and resistant properties makes foil ideal for high-traffic areas. In addition, our pvc foil doesn't require any sophisticated maintenance and it only needs a weekly cleaning with a wet cloth. Moreover, it offers a lower cost than natural materials and there are various styles and finishes available to suit different project requirements and design preferences. And it can be used for wall paneling, furniture surfaces, displays, interior doors, kitchen cabinets, and more in both residential and commercial settings.

Technical Parameters:

Our product has a wide range of thickness from 0.1mm up to 0.5mm, and width from 1260mm to 1400mm; as for the length, it can be customized from 100m to 400m/roll. There are various designs available, such as wood grain, solid color, marble, brick, and many more. Moreover, the surface treatment options include matt, super matt, embossed, high gloss, and soft touch. Our company also provides OEM and ODM services.

Applications:

Different applications have various processes. For example, the Membrane Press (vacuum press) covers materials on MDF, particleboard, wooden board, fiberboard, etc. It is mainly used for doors, kitchen cabinet, wardrobe, furniture, etc. The thickness of the panel could be 0.20-0.50mm. The width of the roll is set at 1260mm, and 1400mm, while the length could be 100-300m. It also envelops an embossed board, and is capable to do five surfaces at the same time.

For the Wrapping Profiles, its The thickness of the panel could be 0.12-0.18mm, width 40-1260mm, and length 300-800m. It is suitable to cover on all kinds of profiles including wood profile, aluminum profile, PVC profile, etc. such as door frame, window sill, base channel, PVC ceiling and so on.

As for the Cold Laminating, the thickness is set at 0.12-0.20mm, width 1240-1260mm, and length 300-500m. It is good for wrapping layers on all kinds of flat panels, such as wood panel, steel panel, aluminum panel, PVC panel, etc. for doors and furniture.

In addition, the Hot Laminating works with 0.16-0.30mm thickness, 1260mm width, and 200-300m length. Its purpose is to cover steel panel, aluminum panel and PVC panel for various uses, such as doors, skirting, and more.

For Self-adhesive, it has 0.10-0.20mm thickness, 600mm/1220mm width, 5-50m/roll length, and is capable to put on any smooth surface for furniture and interior decorations.
