- Printing: 1-5Color Printing
- Highlight: **pvc interior film Antibacterial, Antibacterial Decorative PVC Foil**

Product Description

Product Description:

High Quality PVC Foil for All Purposes!

The main ingredient in our PVC Foil is Polyvinyl Chloride (PVC), a synthetic plastic with excellent properties in terms of strength, flexibility and processing simplicity.

With a variety of colors, patterns, and textures available, this product can imitate the look of real materials such as wood, stone, cloth, or metal, while being more economical and preserving the premium appearance.

Our durable PVC foil is suitable for a wide range of surfaces, such as walls, doors, cabinets, furniture, etc. Effective and efficient when used in different types of settings, its strength and resistance also makes it a popular choice for high-traffic areas.

Once installed, it doesn't need much attention. It only needs to be cleaned once a week with a wet cloth, making maintenance an easy task. In terms of costs, it is significantly lower when compared to natural materials and for this reason it is a fantastic option for creating sophisticated aesthetics without having to pay extra money.

Manufacturers offer a wide variety of styles and finishes, making it possible to modify to satisfy project requirements and individual design preferences.

PVC Foil is often used for wall paneling, furniture surfaces, interior doors, kitchen and bathroom cabinets, retail displays, and much more - both in homes and commercial spaces.

Technical Parameters:

Our products have a wide range of widths, thicknesses, and lengths available to choose from. From 0.1mm-0.5mm, widths ranging between 1260mm and 1400mm, and roll lengths up to 400m, there's sure to be a product fit for your specific application.

We also offer a wide variety of both unique and commonly used designs to choose from, including wood grain, solid colors, marbles, bricks, and more. Our products offer a wide selection of surface treatments and finishes, including matt, super matt, embossed, high gloss, and soft touch.

Building custom themes and designs is our specialty at our company. We provide OEM/ODM services and have the resources to quickly provide you with what you're looking for. We'll work with you to craft creative and high-quality customized products.

Applications:

PVC film has different packing methods for different applications. For example, the membrane press (vacuum press) is thick with a thickness of 0.20 to 0.50 mm, and is suitable for the covering of MDF, particleboard, wooden board, and fiberboard, etc. It can cover embossed boards with five sides at the same time.

For wrapping profiles, the thickness varies from 0.12 to 0.18mm, and the width ranges from 40 to 1260mm. It is used to cover wood profile, aluminum profile, and PVC profile, etc. It is applicable for door frames, window sills, base channels, and PVC ceilings.

As for cold laminating, the thickness is in the range of 0.12 to 0.20mm, and the width is fixed at 1240-1260mm. It is used to cover all types of flat panels, such as wood panel, aluminum panel, steel panel, and PVC panel.

As for hot laminate, the thickness is 0.16 to 0.30mm and the width is 1260mm, while the length can be 200-300m/roll. It is suitable for the covering of PVC panel, steel panel, or aluminum panel.

Finally, self-adhesives have a thickness ranging from 0.10 to 0.20mm and width of 600mm/1220mm with a length of 5-50m/roll. It is applicable for furniture and interior decorations.

Customization:

Customized PVC Membrane Foil Services

Realsun Deco offers customized PVC Membrane Foil services to meet different needs. Our PVC Membrane Foil has features of waterproof, anti-flame, anti-scratch, antibacterial, etc. With width of 1260mm/1400mm and 1-5 color printing, it is ideal for membrane application.
