- Liner Paper: 80gsm, 100gsm, 120gsm
- Highlight: **Self Adhesive Laminating Film Stone Look, Stone Look Pvc Interior Film, High Strength Self Adhesive Laminating Film**

## Product Description

Excellent Durability Self Adhesive PVC Film with High Adhesive Strength in Stone Look

### Product Description:

Our **Self Adhesive PVC Film** is primarily composed of polyvinyl chloride, a synthetic plastic material known for its durability and versatility. A layer of pressure sensitive adhesive is added on the back side of the film and the liner paper is removed before application. The adhesive is designed to bond securely with a variety of surfaces, such as glass, metal, plastic, wood and more. Available in a variety of thicknesses, our film can be tailored to meet your specific requirements. You can also choose from a multitude of finishes, such as glossy, matte, satin and textured. Furthermore, there are numerous color and pattern choices, including wood grain design, marble design and brick design. This film is suited for many applications, ranging from covering walls or furniture to various crafts and DIY tasks. Our self adhesive PVC film is the perfect solution for many projects, due to its ease of use and durability.

### Technical Parameters:

The thickness available of our product ranges from 0.1mm to 0.12mm, and they have two sizes in width, namely 1220mm and 600mm. It's common that the length comes in 50m/roll and 10m/roll. Additionally, we offer a huge variety in designs including wood grain, solid colors, marble, brick and so on. Additionally, there are 5 kinds of surface treatment like matt, super matt, embossed, high gloss, and soft touch to choose from. We want to provide you with best-in-class service, so you can customize your order with OEM or ODM.

### Applications:

Self-adhesive PVC film is a **versatile** and practical material with many applications, from home improvement to crafts and signage. Here's a simple guide to help you get the most out of your self-adhesive PVC films.

You need:

- Self-adhesive PVC film
- A clean, smooth surface to attach the film to (e.g. furniture, walls, windows, etc.)
- A measuring tape or ruler
- A sharp utility knife or scissors
- A squeegee or credit card
- A clean cloth or sponge
- A spray bottle with soapy water, optional

To apply the self-adhesive PVC film:

Ensure that the surface to be covered is clean, dry, and smooth of any dust or dirt. If necessary, clean it thoroughly and let dry completely. Measure the dimensions of the surface, adding a few extra inches to each side for trimming. Cut the PVC film to size with a scissors or utility knife. Be accurate to ensure a proper fit.

Carefully peel back a few inches of the backing paper from one side of the film, taking care not to touch the adhesive side. Start at one corner or edge and apply the adhesive side of the film to the prepared surface. Slowly peel back more of the backing paper while smoothing the film onto the surface.

If there are air bubbles trapped under the film, use a squeegee or credit card to gently push them outwards, starting from the center. Trim excess film around the edges with a utility knife or scissors.

Wipe the surface with a cloth or sponge to ensure a smooth, even application.

Clean away any soapy water residue.

Inspect the surface for any imperfections or issues, fixing them as needed.

Each application of self-adhesive PVC film is unique, so if you are faced with a specific task, make sure to refer to the manufacturer's instructions. With the right preparation and careful application, you can achieve excellent results.

### Customization:

Self Adhesive PVC Film

Brand Name: Realsun Deco

Place of Origin: Foshan, China

Minimum Order Quantity: 3000m/model

Price: Negotiable

Packaging Details: Pack in roll

Delivery Time: 15-20 days

## Support and Services:

---

### Self Adhesive PVC Film Technical Support and Service

We provide our customers with a complete range of technical support and service for Self Adhesive PVC Film. Our experienced technical team can help you choose the right product for your specific application, provide advice on installation, maintenance and troubleshooting. We also offer a variety of services such as custom fabrication, repairs and replacements.

We understand that our customers have unique requirements and our technical team is always ready to provide one-on-one support. We can provide guidance on product selection, installation and maintenance. Additionally, we can provide troubleshooting assistance and offer advice on repair and replacement of components. We also offer custom fabrication services to meet the specific needs of our customers.

Our goal is to ensure that our customers have a positive experience with our products and services. We are committed to providing the highest level of technical support and service for Self Adhesive PVC Film.

## Packing and Shipping:

---

### Packaging and Shipping of Self Adhesive PVC Film:

The product is packaged in a cardboard box, which is then placed into a wooden crate before shipping. The cardboard box is lined with a plastic wrap to ensure the product is secure and protected from any potential damage during shipment. The wooden crate is then sealed with screws to prevent movement and shifting during transport.

To ensure safe delivery, the packages are shipped using a reputable shipping service, such as DHL, FedEx, UPS, or USPS. The wooden crate is labeled with the shipping address, contact information, and any special instructions from the customer.
