- Highlight: **Decorative PVC Film 10m**,
                          Self Adhesive PVC Film 60cm,
                          Self Adhesive PVC Film 10m

Excellent Durability Color Decorative Vinyl Films Self Adhesives within 60cm*10m Size

Product Description:

The self adhesive pvc film we offer is primarily composed of polyvinyl choloride, a synthetic plastic material known for its durability and versatility. We add a layer of pressure sensitive adhesive on the back of the pvc film, and the liner paper is removed before application. The adhesive is designed to bond securely to a variety of surfaces, including glass, metal, plastic, wood, etc. Our self adhesive pvc film can be produced with different thicknesses, allowing you to find the perfect option to meet your application and durability requirements. A number of finishes are available, including glossy, matte, satin, and textures. Colors and patterns such as wood grain, marble, brick, and more, are also available. This PVC film is easy to use in many different applications, such as for covering walls and furniture, as well as for various craft and DIY projects.

Technical Parameters:

If you're looking for high quality materials with various thicknesses, widths, lengths, designs and surface treatments, we got your back! Our products ranges from 0.1mm-0.12mm in thickness, 1220mm and 600mm in width and 50m/roll and 10m/roll in length. We have a diverse selection of wood grain, solid color, marble, brick and many other designs to chose from. Plus, you could choose between matt, super matt, embossed, high gloss, soft touch and other surface treatments. Not only are we able to provide you with superior products, but also accept both OEM and ODM services. So, don't wait any longer, come and join us today!

Applications:

Self-adhesive PVC film is a versatile material that can be used for various applications, including home improvement, crafts, signage, and more. Here's a general guide on how to apply self-adhesive PVC film:
Materials you'll need:
Self-adhesive PVC film
A clean, smooth surface to apply the film to (e.g., furniture, walls, windows, or any other suitable surface)
A measuring tape or ruler
A sharp utility knife or scissors
A squeegee or a credit card
A clean cloth or sponge
A spray bottle with soapy water (optional)
Steps for application:
Prepare the surface: Ensure that the surface you plan to cover with self-adhesive PVC film is clean, dry, and smooth. Remove any dust, dirt, or imperfections. If the surface is dirty, clean it thoroughly and let it dry completely.
Measure and cut: Measure the dimensions of the surface you want to cover and add a few extra inches to each side to allow for trimming. Cut the self-adhesive PVC film to the desired size using a sharp utility knife or scissors. Be precise in your measurements and cutting to ensure a proper fit.
Peel off the backing: Carefully peel back a few inches of the backing paper from one end of the PVC film. Avoid touching the adhesive side to prevent fingerprints and dirt from sticking to it.
Apply the film: Begin applying the exposed adhesive side of the PVC film to the surface. Start at one corner or edge and align it with the surface. As you apply the film, gradually peel off more of the backing paper, smoothing the film onto the surface as you go. You can use a squeegee or a credit card to help remove any air bubbles and ensure a smooth, even application.
Smooth out bubbles: If you notice any air bubbles trapped under the film, use the squeegee or credit card to gently push them out towards the edges. Work from the center outward to expel the bubbles completely.
Trim excess: Once the film is applied smoothly, use a utility knife or scissors to trim any excess film along the edges. Be cautious when cutting to avoid damaging the surface underneath.
Finish and clean: After trimming, go over the entire surface with a clean cloth or sponge to ensure that the PVC film is securely adhered and free from any air bubbles or wrinkles. If you used soapy water during application, wipe away any excess water or soap residue.
Final inspection: Inspect the surface to ensure that the PVC film is securely in place and free from imperfections. If you encounter any issues, gently lift the film and reapply as needed.
Self-adhesive PVC film can be used for a wide range of purposes, so make sure to follow the specific instructions provided by the manufacturer if you have a unique application in mind. Proper surface preparation and careful installation are key to achieving a professional-looking result.

Customization:

Self Adhesive PVC Film
Brand Name : Realsun Deco
Place of Origin : Foshan, China
Minimum Order Quantity : 3000m/model
Price : Negotiable
Packaging Details : Pack in roll

Support and Services:

Technical Support and Service for Self Adhesive PVC Film

We offer comprehensive technical support and service for our Self Adhesive PVC Film products. Our service includes:

Pre-sales technical support and product consultation

On-site installation and setup

Regular maintenance and repair

Troubleshooting and technical advice

Spare parts and accessories supply

Our experienced technical team is available to provide technical assistance and support for all Self Adhesive PVC Film products. If you have any questions or queries, please do not hesitate to get in touch.

Packing and Shipping:

Packaging and Shipping for Self Adhesive PVC Film

Self Adhesive PVC Film is best packaged and shipped in corrugated cardboard boxes to protect the product from damage caused by external forces. Each box should be lined with bubble wrap or other suitable packing material to cushion the product and prevent any damage due to shock.

To ensure the product's safety during shipping, it should be securely sealed in the box with heavy-duty tape or strapping. The boxes should be labeled clearly with the product name, destination address, and contact information.
