Product Description

Easy Installation Brick Design Self Adhesive Wallpaper Quick and Easy Living Room/Bedroom/TV Background Update

Product Description:

The self adhesive pvc wallpaper is a high quality decorative product constructed from polyvinyl chloride (PVC) plastic, a material liked for its strength and versatility. For installation, a layer of pressure sensitive adhesive is applied to the back of the PVC film, and unlined paper is removed prior to application. There are a number of thicknesses available, depending on the application and its required durability. The wallpaper can also be made with several different finishes, like glossy, matte, satin and textured, each which gives it a distinctive look and touch. Additionally, the product is available with many colors and patterns, such as wood grain designs, marble designs and brick designs, making it perfect for any home decor. This type of wallpaper is widely used to cover walls, furniture and other objects, as well as in craft and do-it-yourself projects due to its easy to use nature.

Technical Parameters:

The thickness of this product can range from 0.1mm to 0.15mm, depending on customer needs. The widths of 1220mm and 600mm are both available. Moreover, the length can be either 50m per roll or 10m per roll. It also has a variety of design options, such as wood grain, solid color, marble, brick and so on. In terms of surface treatment, there are matt, super matt, embossed, high gloss and soft touch varieties. Finally, both OEM and ODM services are available.

Applications:

How to Apply Self-Adhesive PVC Wallpaper

Self-adhesive PVC wallpaper is a versatile and useful material with a wide range of applications. To properly install self-adhesive PVC, you will need the following materials:

Self-adhesive PVC wallpaper

A clean, smooth surface to apply the film to (e.g., furniture, walls, windows, or any other suitable surface)

A measuring tape or ruler

A sharp utility knife or scissors

A squeegee or a credit card

A clean cloth or sponge

A spray bottle with soapy water (optional)

Follow these steps for a successful installation:

Prepare the surface. Ensure the wall is clean, dry, and smooth. Remove any dust, dirt, or imperfections, and if necessary, use soap or water to clean it. Let it dry before you proceed.

Measure and cut. Measure the dimensions of the surface and add a few extra inches in each side to allow for any trimming that may be necessary. Once the measurements are taken, cut the self-adhesive PVC wallpaper to the desired size with a sharp utility knife or scissors.

Peel off the backing. Carefully peel back a few inches of the backing paper from one end of the PVC wallpaper. Avoid touching the adhesive side of the wallpaper to prevent fingerprints and dirt from sticking to it.

Apply the wallpaper. Start at one corner or edge and align it with the surface. As you apply the film, gradually peel off more of the backing paper and smoothen the film onto the surface as you go. You can use a squeegee or a credit card to help remove any air bubbles and ensure a smooth, even application.

Smooth out bubbles. If you see any air bubbles trapped underneath the wallpaper, use the squeegee or credit card to gently push them out towards the edges. Work from the center and outward to expel the bubbles completely.

Trim excess. Use a sharp utility knife or scissors to trim the wallpaper along the edges. Be very careful when cutting to avoid damaging the surface underneath.

Finish and clean. Wipe the entire surface with a clean cloth or sponge to make sure the PVC wallpaper is securely adhered and free from any air bubbles or wrinkles. If necessary, wipe away any excess water or soap residue.

Final inspection. Go over the surface one more time to make sure there are no imperfections. If you come across any issues, gently lift the film and reapply as needed.

Customization:

Realsun Deco offers you custom service of Self Adhesive PVC Wallpaper. The product is from Foshan, China, and the minimum order quantity is 3600sqm/model. The price is negotiable and it is packed in roll. The delivery time is 15-20 days and the payment term is T/T 30% down payment, 70% balance before shipment. The supply ability is 500000m/month.
