Product Description

Product Description:

Our PVC foil is mainly made of Polyvinyl Chloride (PVC), a synthetic plastic material known for its strength, flexibility and ease of processing. It is available in a various of colors, patterns, and textures. It can be made to look like natural materials such as wood, stone, fabric or metal, so that you can have the same high-quality aesthetic without the same cost.

Our PVC foil can be applied to different surfaces, such as doors, cabinets, furniture and walls. Due to its robustness, it is often used in high-traffic locations. Additionally, it can be attached to various substrates and is easy to maintain, usually requiring just weekly wiping with a damp cloth. It also cost much less than natural materials.

An array of styles and finishes are available for clients to choose from in order to customize their projects and designs according to their preferences. You can find this decorative PVC foil in residential and commercial settings, which can be used for kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

Technical Parameters:

Our plastic film comes in a wide variety of thickness, from 0.1mm to 0.5mm. We have two available widths, 1260mm and 1400mm, with a length of between 100m and 400m per roll. We offer a selection of uniquely designed patterns, including woods grains, solid colours, marbles, bricks and more. Customers can also choose from a broad range of surface treatments, such as matt, super matt, embossed, high gloss and soft touch. Moreover, we provide both OEM and ODM services to further meet customers' needs.
