

## Anti Scratch PVC Membrane Foil Rolls For MDF In Pearl Shiny Color

Our Product Introduction

for more products please visit us on [realsundeco.com](http://realsundeco.com)

### Basic Information

- Place of Origin: Foshan, China
- Brand Name: Realsun Deco
- Minimum Order Quantity: 3000m/model
- Price: Negotiable
- Packaging Details: Pack in roll
- Delivery Time: 15-20 days
- Payment Terms: T/T 30% down payment, 70% balance before shipment
- Supply Ability: 500000m/month

### Product Specification

- Features: Waterproof, Anti Flame, Anti-scratch, Antibacterial etc.
- Length: 100m-400m/roll
- Packaging: Rolls
- Material: PVC
- MOQ: 2000-3000m/model
- Printing: 1-5Color Printing
- Width: 1260mm/1400mm
- Usage: Lamination, Vacuum Membrane Press, Wrapping, Hot Pressetc.
- Highlight: **Anti scratch PVC Membrane Foil, PVC Membrane Foil for MDF, pvc membrane film for MDF**

## Product Description

### Anti-scratch PVC Foil for MDF in Pearl Shiny Color – Excellent Quality

#### Product Description:

Our pvc decorative foil is primarily made from Polyvinyl Chloride (PVC), which is a synthetic material known for its high quality, flexibility, and ease of processing. It offers a range of colors, patterns, and textures that can mimic the look of natural materials such as wood, stone, fabric, or metal while providing a cost-effective alternative to these materials.

It can adhere to different substrates making it ideally suited for a variety of surfaces, including doors, cabinets, furniture, walls, and more. It is also highly durable and resilient to deterioration and is frequently used in high-traffic locations. Its low maintenance requirements make it simple to keep; a moist cloth wipe down once a week usually does the trick.

The affordability of pvc decorative foil in comparison to natural materials is definitely one of its best features. It makes it possible to get upscale aesthetics that you might not otherwise be able to afford. Furthermore, suppliers provide a large range of styles and finishes to modify to meet the specifications and personal preferences of the project.

Decorative pvc foil is popularly used in residential and commercial settings for applications such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

#### Features:

Product Name: PVC Membrane Foil

MOQ: 2000-3000m/model

Surface: Smooth, Embossed, Texture, Matte, Super Matte, Soft Touch, High Gloss

Usage: Lamination, Vacuum Membrane Press, Wrapping, Hot Press etc.

Length: 100m-400m/roll

Specialties: PVC ceiling film, PVC thermo foil, PVC sheet for furniture

#### Technical Parameters:

Our company provides a wide range of quality decorative products with varying thickness, width and length.

From 0.1mm to 0.5mm in thickness, 1260mm to 1400mm in width, and 100m to 400m in length per roll, you'll find our products suitable for almost any needs. We also offer various designs such as wood grain, solid color, marble, brick, and more.

Our products are available in different finishes like matt, super matt, embossed, high gloss, and soft touch. Moreover, we provide tailored services such as OEM and ODM. Here at our product, you can get quality products and the most ideal service.

#### Applications:

Different Process for Different Applications:

Membrane Press (Vacuum Press)

This process is used for covering MDF, particleboard, wooden board, fiberboard, etc., for doors, kitchen cabinets, wardrobes, and furniture. It requires a thickness of 0.20 to 0.50 millimeters, a width of 1260 to 1400 millimeters, and a length of 100 to 300 meters per roll. With membrane press, five surfaces can be covered at the same time.

Wrapping Profiles

This process is used for wrapping and covering all kinds of profiles including wood, aluminum, and PVC profiles, for door frames, window sills, base channels, and PVC ceilings. It requires a thickness of 0.12 to 0.18 millimeters, a width of 40 to 1260 millimeters, and a length of 300 to 800 meters per roll.

Cold Laminating

This process is used for covering all kinds of flat panels, such as those made of wood, steel, aluminum, and PVC, for doors and furniture. It requires a thickness of 0.12 to 0.20 millimeters, a width of 1240 to 1260 millimeters, and a length of 300 to 500 meters per roll.

Hot Laminating

This process is used for covering the PVC panel, steel panel, and aluminum panel for doors, skirting and so on. It requires a thickness of 0.16 to 0.30 millimeters, a width of 1260 millimeters, and a length of 200 to 300 meters per roll.

Self-Adhesive

This process is used for putting on any smooth surface for furniture and indoor decorations. It requires a thickness of 0.10 to 0.20 millimeters, a width of 600 or 1220 millimeters, and a length of 5 to 50 meters per roll.
