Anti Flame Colorful Embossed PVC Membrane Foil Width 1260mm/1400mm for MDF Lamination

Product Description:

Our pvc foil is primarily made from Polyvinyl Chloride (PVC), a synthetic plastic material known for its durability, flexibility, and ease of processing. It is available in a wide range of colors, patterns, and textures, and can effectively mimic the look of natural materials such as wood, stone, fabric, or metal. Besides, it is also highly versatile, since it can be applied to a variety of surfaces, including doors, cabinets, furniture, walls, and more.

Realsun Deco PVC foil is known for its resilience to deterioration and strength, and this durable material is frequently used in high-traffic locations. It requires little upkeep once installed, and can usually just be wiped down once a week with a moist cloth. Furthermore, decorative pvc foil is very affordable in comparison to natural materials, making it possible to create upscale aesthetics without incurring the related expenses.

In addition, a large range of styles and finishes are available from manufacturers, enabling modification to meet project specifications and personal design preferences. Decorative pvc foil is now commonly used in residential and commercial settings for applications such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.
