

High Performance PVC Membrane Film For Door Scratch Proof 140cm Width

Our Product Introduction

for more products please visit us on realsundeco.com

Basic Information

- Place of Origin: Foshan, China
- Brand Name: Realsun Deco
- Minimum Order Quantity: 3000m/model
- Price: Negotiable
- Packaging Details: Pack in roll
- Delivery Time: 15-20 days
- Payment Terms: T/T 30% down payment, 70% balance before shipment
- Supply Ability: 500000m/month

Product Specification

- Features: Waterproof, Anti Flame, Anti-scratch, Antibacterial etc.
- Material: PVC
- Packaging: Rolls
- Surface: Smooth, Embossed, Texture, Matte, Super Matte, Soft Touch, High Gloss
- Width: 1260mm/1400mm
- Printing: 1-5Color Printing
- MOQ: 2000-3000m/model
- Length: 100m-400m/roll
- Highlight: **pvc lamination film Scratch Proof, PVC Membrane Film Scratch Proof, PVC Membrane Film 140cm**

Product Description

Product Description:

Our **PVC foil** is primarily made from Polyvinyl Chloride (PVC), a synthetic plastic material known for its durability, flexibility, and ease of processing.

This decorative material presents a wide range of color options, textures, and patterns. It is a cost-effective alternative to natural materials such as wood, stone, fabric, or metal while still providing a beautiful aesthetic.

Moreover, our PVC foil is highly versatile -- it can be applied to different surfaces, such as doors, cabinets, furniture, etc., and different areas in the interiors. It also adheres well to other substrates.

We are confident in the durability of this product, for it has been tested and proven to be resilient to deterioration and strong enough to withstand high-traffic locations. What's more, it is simple to maintain; usually, a moist cloth can do the job once a week.

Besides, our PVC foils are cost-effective compared to natural materials; they enable you to create the same luxurious looks without the price.

Although we present a wide range of styles and finishes, customization is possible. That means you can modify these materials according to project specifications and personal design preferences.

Lastly, Decorative PVC foil can commonly be found in residential and commercial settings. It is used for various applications, such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, etc.

Features:

Product Name: PVC Membrane Foil

Printing: 1-5Color Printing

Usage: Lamination, Vacuum Membrane Press, Wrapping, Hot Press etc.

MOQ: 2000-3000m/model

Length: 100m-400m/roll

Thickness: 0.14mm-0.5mm

Keywords: pvc deco sheet, pvc membrane foil for door, pvc sheet for cabinet

Technical Parameters:

Specification of the Product:

The product has a great range for its thickness, from 0.1mm to 0.5mm. The width is measured at 1260mm or 1400mm. It is available in rolls in length that can vary from 100 to 400m.

Various designs of the product available can be chosen depending on one's specific preferences and needs, such as Wood grain, Solid color, Marble, Brick, etc.

In addition, the product can be processed in different surface treatment types, for example Matt, Super matt, Embossed, High gloss, Soft touch.

Service: We offer both OEM and ODM service so as to meet different requirements.

Applications:

Membrane Press (vacuum press)

This process is used to cover different substances such as MDF, particleboard, wooden board, fiberboard, etc., for doors, kitchen cabinet, wardrobe, furniture, etc., where the thickness of the material being used is 0.20-0.50mm and the width ranges from 1260mm to 1400mm. In addition, the length of the roll is 100-300m. With this process, it is possible to cover embossed board and cover five surfaces at the same time.

Wrapping Profiles

This process is used for wrapping profiles and cover different substances such as wood profile, aluminum profile, PVC profile, etc., for door frame, window sill, base channel, PVC ceiling and so on. It is designed to handle materials with a thickness ranging from 0.12-0.18mm, width of 40-1260mm and the length of a roll of 300-800m.

Cold Laminating

This system is used to cover different flat panels such as wood panel, steel panel, aluminum panel, PVC panel, etc., for doors and furniture. It requires a thickness of 0.12-0.20mm and a width of 1240-1260mm, with the length of a roll ranging from 300-500m.

Hot Laminating

In this process, the thickness of the material should be 0.16-0.30mm with a width of 1260mm and a roll length of 200-300m. Such materials are typically used to cover the PVC panel, steel panel, aluminum panel for doors, skirting and etc.

Self-adhesive

This process is employed to bond two materials together and is suitable for any smooth surface such as furniture and indoor decorations, which the thickness of the material should be 0.10-0.20mm and the width is 600mm/1220mm, with the length of a roll being 5-50m.

Customization:

We, Realsun Deco, offer **PVC Membrane Foil** with the following features:

Brand Name: Realsun Deco

Place of Origin: Foshan, China

Minimum Order Quantity: 3000m/model

Price: Negotiable

Packaging Details: Pack in roll

Delivery Time: 15-20 days

Payment Terms: T/T 30% down payment, 70% balance before shipment

Supply Ability: 500000m/month

Surface: Smooth, Embossed, Texture, Matte, Super Matte, Soft Touch, High Gloss

Usage: Lamination, Vacuum Membrane Press, Wrapping, Hot Pressetc.

Packaging: Rolls

Material: PVC

Length: 100m-400m/roll

Keywords: PVC thermo foil, PVC sheet for furniture, PVC thermo foil for furniture

Packing and Shipping:

Packaging and Shipping of PVC Membrane Foil

PVC Membrane Foil is wrapped in rolls and protected on the outside with a plastic sheet, kraft paper head, and foam sheet. Shipping of PVC Membrane Foil is typically done by ground, air, or sea depending on the size and weight of the product. The shipment cost will vary based on the chosen method of shipping.
