- Usage: Lamination, Vacuum Membrane Press, Wrapping, Hot Pressetc.
- Highlight: **Membrane Press Pvc Self Adhesive Foil, Kitchen Cabinet Pvc Self Adhesive Foil, Membrane Press Kitchen Cabinet film**

Product Description

Reliable and Durable Membrane Press PVC Foil for Kitchen Cabinet/Wardrobe/Door/Ceiling

Product Description:

Material: Our PVC foil is primarily made of Polyvinyl Chloride (PVC), a synthetic plastic material that is known for its durability, flexibility, and easy processing.

Appearance: Our PVC foil comes in a wide range of colors, patterns, and textures, giving it the capability to imitate a wide range of natural materials such as wood, stone, fabric, or metal while maintaining a high-quality finish at a low cost.

Versatility: The foil can be applied to several different surfaces like doors, cabinets, furniture, walls, etc., and can adhere to various substrates. It can also be used in various locations in the interior.

Durability: Realsun Deco PVC foil has a great reputation when it comes to strength and resilience. It is often used in high-traffic areas because of its strength.

Maintenance: The PVC foil requires little maintenance as it just needs to be wiped down once a week with a moist cloth.

Cost-effective: Applying a decorative PVC foil is a more cost-effective way in comparison to choosing natural materials, due to its affordable price. It is a great way to create upscale aesthetics without spending a lot of money.

Modification: PVC foil is made in various styles and finishes by manufacturers, which enables modifications to any project or home design according to personal preference.

Application: Decorative PVC foil is widely used in both residential and commercial spaces. It is suitable for numerous applications such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

Features:

Product Name: PVC Membrane Foil

Material: PVC

Surface: Smooth, Embossed, Texture, Matte, Super Matte, Soft Touch, High Gloss

Length: 100m-400m/roll

Features: Waterproof, Anti Flame, Anti-scratch, Antibacterial, etc.

Thickness: 0.14mm-0.5mm

Keywords: pvc thermo foil, pvc membrane foil, pvc foil for mdf, pvc film for furniture

Technical Parameters:

The thickness of provided products starts from 0.1mm and can go as high as 0.5mm.

The available widths are either 1260mm or 1400mm long.

The length can vary from 100-400m per roll.

The design choice for the products include wood grain, solid color, marble, brick and more.

The surface treatments for the products include matt, super matt, embossed, high gloss and soft touch.

Besides these products, we also provide OEM, ODM, and one-stop solution services to meet your needs.

Applications:

Membrane Press (vacuum press) is used to cover materials such as MDF, particleboard, wooden board, and fiberboard to form doors, kitchen cabinets, wardrobes, and furniture. It can also be used on embossed boards, and can cover up to five surfaces at the same time. Thickness ranges from 0.20-0.50mm, and widths from 1260mm-1400mm. Lengths range from 100-300m/roll.

Wrapping Profiles are used to cover materials such as wood profile, aluminum profile, and PVC profile to form door frames, window sills, base channels, and PVC ceilings. The thickness is from 0.12-0.18mm, and widths range from 40-1260mm. Lengths range from 300-800m/roll.

Cold Laminating is used to cover materials such as wood panels, steel panels, aluminum panels, and PVC panels, and is used for door and furniture applications. Thickness ranges from 0.12-0.20mm, and widths range from 1240-1260mm. Lengths range from 300-500m/roll.

Hot Laminating is used to cover PVC panel, steel panel, and aluminum panel for doors, skirting, and more. It ranges from 0.16-0.30mm in thickness, and 1260mm in width for 200-300m/roll.

Self-adhesive is used to put on any smooth surface for furniture and indoor decorations. Thickness ranges from 0.10-0.20mm, with widths of 600mm/1220mm for lengths of 5-50m/roll.

Packing and Shipping:

PVC Membrane Foil should be packaged and shipped in a manner that ensures its safety and integrity. The following measures should be taken:

PVC film is rolled up and sealed with an outer plastic sheet, kraft paper head, and foam protective sheet.

Ensure that the roll is properly labeled with the product name, quantity and destination.

Ship the container using a reliable shipping carrier, such as UPS or FedEx.
