                                        Wood Grain Self Adhesive Furniture Film

Product Description

Good Texture Wood Grain PVC Self Adhesive Furniture Film 60cm*10m for Refurbished Furniture

Product Description:

Our self adhesive pvc film is mainly made up of polyvinyl chloride, a kind of synthetic plastic that has a reputation for being strong and usable for a lot of different purposes. We add an adhesive layer to the back of the film, with an additional top layer of a paper lining that needs to be removed prior to application, and the adhesive is engineered to stick easily to materials like glass, metal, plastic, and wood.

The thickness of the film can also be tailored to you needs, depending on the purpose and level of resilience required. It is accessible in a wide scope of finishes such as glossy, matte, satin, and textured, and colors and designs such as wood, marble, and brick. It can be used for covering walls, furniture, and other crafts and DIY projects due to its accommodating nature.

Features:

Product Name: Self Adhesive PVC Film
Adhesive: Acrylic Pressure Sensitive Adhesive
Surface: Glossy/Matte/Super Matte/Embossed/Soft Touch
Material: PVC
Durability: Excellent
Liner Paper: 80gsm, 100gsm, 120gsm
Also known as: self adhesive pvc foil, contact paper, self adhesive foil

Technical Parameters:

Composite films produced by us are of great quality as they range from 0.1 to 0.12 mm in terms of thickness. Additionally, they can be availed in variable widths like 1220 mm and 600 mm. Also, they come in roll form that has a length of 50m as well as 10m. In terms of design, it is possible to customize it according to individual preferences such as Wood grain, Solid color, Marble, Brick and so on. Moreover, various surface treatments like Matt, Super matt, embossed, high gloss, and soft touch are available. Furthermore, we offer customized services such as OEM and ODM.

Applications:

Self-adhesive PVC film is a versatile material that can be used for various applications, including home improvement, crafts, signage, and more. Here's a general guide on how to apply self-adhesive PVC film:
Materials you'll need:
Self-adhesive PVC film
A clean, smooth surface to apply the film to (e.g., furniture, walls, windows, or any other suitable surface)
A measuring tape or ruler
A sharp utility knife or scissors
A squeegee or a credit card
A clean cloth or sponge
A spray bottle with soapy water (optional)
Steps for application:
Prepare the surface: Ensure that the surface you plan to cover with self-adhesive PVC film is clean, dry, and smooth. Remove any dust, dirt, or imperfections. If the surface is dirty, clean it thoroughly and let it dry completely.
Measure and cut: Measure the dimensions of the surface you want to cover and add a few extra inches to each side to allow for trimming. Cut the self-adhesive PVC film to the desired size using a sharp utility knife or scissors. Be precise in your measurements and cutting to ensure a proper fit.
Peel off the backing: Carefully peel back a few inches of the backing paper from one end of the PVC film. Avoid touching the adhesive side to prevent fingerprints and dirt from sticking to it.
Apply the film: Begin applying the exposed adhesive side of the PVC film to the surface. Start at one corner or edge and align it with the surface. As you apply the film, gradually peel off more of the backing paper, smoothing the film onto the surface as you go. You can use a squeegee or a credit card to help remove any air bubbles and ensure a smooth, even application.
Smooth out bubbles: If you notice any air bubbles trapped under the film, use the squeegee or credit card to gently push them out towards the edges. Work from the center outward to expel the bubbles completely.
Trim excess: Once the film is applied smoothly, use a utility knife or scissors to trim any excess film along the edges. Be cautious when cutting to avoid damaging the surface underneath.

Finish and clean: After trimming, go over the entire surface with a clean cloth or sponge to ensure that the PVC film is securely adhered and free from any air bubbles or wrinkles. If you used soapy water during application, wipe away any excess water or soap residue.

Final inspection: Inspect the surface to ensure that the PVC film is securely in place and free from imperfections. If you encounter any issues, gently lift the film and reapply as needed.

Self-adhesive PVC film can be used for a wide range of purposes, so make sure to follow the specific instructions provided by the manufacturer if you have a unique application in mind. Proper surface preparation and careful installation are key to achieving a professional-looking result.

Customization:

Customized Self Adhesive PVC Film
Realsun Deco is a professional manufacturer of self adhesive PVC film, which provides customized services. Our product has excellent durability and can be made into a variety of sizes and thicknesses. Our product also comes in a variety of designs such as wood grain, marble, brick, stone, and plain color.
