Product Description

Plastic Sheet Pvc Rigid Film 0.5mm Thick For Vacuum Membrane Press MDF

Product Description:

Our PVC Foil is primarily made from Polyvinyl Chloride (PVC), a synthetic material that is noted for its durability, flexibility, and ease of processing. It is available in a wide range of colors, patterns, and textures, offering a cost effective alternative to natural materials such as wood, stone, fabric, or metal, while retaining a high-quality aesthetic.

This foil can be applied to a variety of surfaces, including doors, cabinets, furniture, walls, and more. It adheres well to different substrates and is commonly used in interior applications. Realsun Deco PVC Foil is recognized for its excellent durability to withstand daily wear and tear, making it suitable for high traffic areas.

Our PVC Foil requires minimal upkeep after installation, usually just needing to be wiped down with a moist cloth once a week. Along with its cost-effectiveness compared to natural materials, this product offers a large range of styles and finishes enabling modification to meet personal design preferences.

Decorative PVC Foil is a very popular material for residential and commercial use. It can be installed on kitchen and bathroom cabinets, interior doors, wall paneling, surfaces of furniture, retail displays, and more.

Packing and Shipping:

Packaging and Shipping of PVC Interior Film

PVC Interior Film is typically packaged in rolls. The rolls come in varying widths and lengths. The rolls usually come in a protective wrap to prevent them from getting damaged during shipping.

PVC Interior Film is usually shipped via ground or air, depending on the urgency of the order. All orders are carefully packed and labeled properly to ensure that they arrive safely and undamaged. The shipping cost will depend on the weight, size, and destination of the order.
