MDF Board decorative laminate film,
Soft Touch PVC Lamination Film

Product Description

Soft Touch Surface PVC Lamination Roll Film for Hot Press MDF Board for Furniture

Product Description:

The primary material used in Realsun Deco PVC Foil is Polyvinyl Chloride (PVC), a synthetic plastic with exceptional strength, flexibility, and simple processing. Furthermore, we offer a variety of colors, patterns, and textures to choose from. And compared to real materials such as wood, stone, cloth or metal, our PVC foil can imitate their appearance while being a much more affordable option and still maintain a premium-looking display.

Our PVC foil is suitable for a broad variety surfaces, such as walls, doors, cupboards, and furniture. It is effective on many surfaces and can be utilized in various interior spaces. Realsun Deco PVC foil is well-known for its longevity and strength. Its resilience makes it an ideal choice for high-traffic areas.

Once installed, it only needs to be cleaned once a week with a damp cloth which makes maintenance convenient. Moreover, one of the biggest advantages of PVC Decorative Foil is it is more economical when compared to natural materials. This makes it possible to create sophisticated aesthetics without the associated costs.

Manufacturers offer many styles and finishes, allowing modifications to meet project needs and individual design preferences. Decorative PVC foil is widely used for wall paneling, furniture surfaces, retail displays, indoors doors, kitchen and bathroom cupboards, and other uses both in commercial and home settings.

Features:

Product Name: PVC Lamination Film

Application: Furniture, Door, Wall, Kitchen Cabinet, Ceiling Etc.

Length: 100m-400m/roll

Thickness: 0.1mm-0.5mm

Surface: Glossy, Matte, Embossed, Super Matte, Soft Touch
