- Highlight: **Hot Press Furniture Wrapping Film, 400m Furniture Wrapping Film,**

Product Description

Matte PVC Lamination Film for Hot Press Applications

Product Description:

The main ingredient of our PVC foil is Polyvinyl Chloride (PVC), a synthetic plastic material with excellent strength, flexibility, and processing simplicity.

We provide various colors, patterns, and textures for our PVC foil. It can imitate the look of wood, stone, cloth, or metal while being more cost-effective and maintaining a premium impression.

Our foil is suitable for a wide range of surfaces, such as walls, doors, cabinets, and furniture. Due to its reinforced strength and resistance to wear and tear, it is considered ideal for high-traffic places.

Maintenance of PVC decorative foil is easy as it only needs to be wiped with a wet cloth once a week. Furthermore, its competitive price allows for the creation of decors without breaking the bank.

Manufacturers also provide a wide variety of styles and finishes, making it possible to customize our PVC foil according to individual needs. In addition, it is frequently used for wall paneling, furniture surfaces, retail displays, interior doors, and various other home and commercial uses.

Features:

Product Name: PVC Lamination Film

Application: Furniture, Door, Wall, Kitchen Cabinet, Ceiling Etc.

Design: Wood Grain, Marble, Brick, Stone, Plain Color Etc.

Surface: Glossy, Matte, Embossed, Super Matte, Soft Touch

Length: 100m-400m/roll

Width: 1260mm, 1400mm

Keywords: lamination vinyl film, lamination pvc foil, decorative foil

Technical Parameters:

Our UV printing board has high flexibility: its thickness ranges from 0.1mm to 0.5mm, with the width of 1260mm and 1400mm, and the length of 100-400m per roll. You are also free to choose from a wide variety of designs, such as wood grain, solid color, marble, brick and so on. The various surface treatments we offer include matt, super matt, embossed, high gloss, and soft touch. Additionally, we deliver OEM and ODM services as well.

Applications:

For **membrane press** (also known as vacuum press), the thickness varies from 0.20 to 0.50mm while the widths range from 1260mm and 1400mm and the length is usually 100 to 300m per roll. It is mainly used to cover MDF, particleboard, wooden board, and fiberboard, for making doors, kitchen cabinets, wardrobe, furniture, etc. This process is capable of cover the embossed board, and cover five surfaces at the same time.

For **wrapping profiles**, the thickness varies from 0.12 to 0.18mm while the width range from 40 to 1260mm and the length is 300 to 800m per roll. This process is mainly used to cover all kinds of profiles, including wood profile, aluminum profile, PVC profile, etc. for door frame, window sill, base channel, PVC ceiling and so on.

For **cold laminating**, the thickness varies from 0.12 to 0.20mm while the width is 1240 to 1260mm and the length is 300 to 500 m per roll. This process is mainly used to cover all kinds of flat panels, such as wood panel, steel panel, aluminum panel, PVC panel, for making doors and furniture.

For **hot laminating**, the thickness varies from 0.16 to 0.30mm while the width is 1260mm and the length is 200 to 300m per roll. This process is mainly used to cover the PVC panel, steel panel, aluminum panel for making doors, skirting, and so on.

For **self-adhesive**, the thickness varies from 0.10 to 0.20mm while the width is 600mm or 1220mm and the length is 5 to 50m per roll. This process is mainly used to put on any smooth surface for making furniture and indoor decorations.
