Product Description

Product Description:

Glorious Benefits of Realsun Deco PVC Foil

Realsun Deco PVC Foil is an excellent option for interior design, thanks to its amazing benefits. Here are several points on why it's a great choice for any space.

Material

Polyvinyl Chloride (PVC) is the main ingredient of our pvc foil. It is a synthetic plastic known for its strength, flexibility, and processing simplicity.

Appearance

This foil comes in a variety of colors, patterns, and textures, replicating the look of natural materials such as wood, stone, cloth, or metal, yet still being more affordable and having a premium appearance.

Adaptability

Our foil is suitable for different surfaces, such as walls, doors, cabinets, and furniture. It works effectively and can be installed in any interior space.

Durability

Our pvc foil is well-known for its strength and resistance to deterioration, making it a popular choice for high-traffic areas.

Maintenance

Maintenance is no hassle at all as our pvc foil only needs to be cleaned once a week with a wet cloth.

Economical

It provides a lower cost than natural materials, so you can achieve a sophisticated look without having to splurge.

Modification

A wide variety of styles and finishes are available, allowing you to modify to meet any project requirements and design preferences.

Application

Our pvc foil is often used in residential and commercial settings for wall paneling, furniture surfaces, retail displays, interior doors, cabinet panels, and much more.

Features:

Product Name: PVC Furniture Film

Width: 1260mm, 1400mm

Thickness: 0.1-0.5mm

Surface: Glossy, Matte, Embossed, Super Matte, Soft Touch etc.

Material: PVC

Feature: Waterproof, Anti Flame, Anti Scratch, Antibacterial, Etc.

Purpose: Furniture Laminating Film, Thermofoil Film for Furniture, etc.

Technical Parameters:

We have a great range of aluminum composite panels for your selection, with each panel having a thickness of 0.1-0.5 mm. The **width** of the panels can be customized to 1260mm or 1400mm. The **length** can be anywhere from 100m-400m per roll. There are various design options to choose from, such as woodgrain, solid color, marble, and brick. The **surface** treatment of the panels can either be matt, super matt, embossed, high gloss, or soft touch. In addition, we provide highly personalized **OEM** and **ODM** services.

Applications:

Membrane Press (vacuum press)

This is primarily used to cover surfaces such as MDF, particleboard, wooden board, and fiberboard with a thickness from 0.2 to 0.5mm. It can cover up to five surfaces simultaneously and can be utilized for doors, kitchen cabinets, wardrobes, and other types of furniture. The width is at 1260mm and 1400mm, and it has a length of 100 to 300 meters per roll.

Wrapping Profiles

Will only cover any type of profile such as wood profile, aluminum profile, and PVC profile with the rolled thickness starting from 0.12 and up to 0.18mm. It has a width of 40 to 1260mm, and a length of 300 to 800 meters. Useful for doors, frames, window sills, base channels, PVC ceiling and more.

Cold Laminating

This is suitable for surfaces such as wood panels, steel panels, aluminum panels, and PVC panels. The rolled thickness is from 0.12 to 0.2mm and is able to cover up to 1260mm in width and 300 to 500 meters in length. It can be used in doors and furniture.

Hot Laminating

This process is mainly used for covering PVC panels, steel panels, and aluminum panels with a thickness from 0.16 to 0.3mm. Its width is set to 1260mm and the length is from 200 to 300 meters per roll. Ideal for doors, skirting, and related applications.

Self-adhesive

This type is typically used for furniture and interior decorations with a thickness from 0.1 to 0.2mm. Its width is 600mm and 1220mm, and the length is from 5 to 50 meters per roll. It is applicable to any smooth surfaces.

Customization:

Realsun Deco is specialized in providing customized services for PVC Furniture Film, which originates from Foshan, China. With a minimum order quantity of 3000m/model, the price of the product is negotiable. The delivery time is 15-20 days, and the payment terms are T/T 30% down payment, 70% balance before shipment. Realsun Deco also offers competitive supply ability of 500000m/month, with roll packing and sheet packing available. The product features waterproof, anti flame, anti scratch, antibacterial, etc. while offering glossy, matte, embossed, super matte, and soft touch surfaces. Realsun Deco specializes in furniture laminating film, furniture decorative foil, and furniture vinyl film.

Packing and Shipping:

The PVC Furniture Film is packaged and shipped using the following processes:

The PVC Furniture Film is wrapped in protective plastic to prevent damage during transportation.

The package is then shipped in a pallet to ensure it arrives in perfect condition.

The package is labeled with the product name, quantity, and shipping address.

The package is tracked throughout its journey to ensure it is delivered properly.
