- Material: PVC
- Width: 1260mm, 1400mm
- Highlight: **furniture laminating film Roll Packing, Wood Grain PVC Film Roll Packing**

Product Description

Product Description:

Our PVC foil is made of Polyvinyl Chloride (PVC), a synthetic plastic that is well-known for its excellent flexibility, strength, and easy processing. We offer a number of different colors, patterns, and textures to choose from, so our PVC foil can be made to look like real-world materials like wood, stone, cloth, or metal, while still being more economical and maintaining a premium feel and look. Our PVC foil is suited for many different applications, including walls, doors, cabinets, and furniture, and can do well in high-traffic areas without needing too much care or maintenance - a simple weekly wipe with a wet cloth is usually enough to keep it in excellent condition. We also pride ourselves on offering economical options for our customers. PVC decorative foil is much cheaper than natural materials, and it is so versatile and customizable that it will easily meet any stylistic or functional requirements you may have. Finally, PVC decorative foil often finds its use in interior decorations, furniture surfaces, retail displays, interior doors, kitchen and bathroom cabinets - it can be used both in homes and businesses. We think you'll be able to find a way to incorporate it in your projects that fits your requirements perfectly!

Features:

Product Name: PVC Furniture Film

Features:

Waterproof

Anti Flame

Anti Scratch

Antibacterial

etc.

Width: 1260mm, 1400mm

MOQ: 3000m/model

Payment Term:

T/T

L/C

Paypal

etc.

Packing:

Roll Packing

Sheet Packing

Product Application:

PVC Laminate Film for Furniture

Furniture Decorative Foil

Furniture Laminating Film

Technical Parameters:

Our products come in different thicknesses ranging from 0.1mm to 0.5mm.

We provide two choices of width, 1260mm and 1400mm.

We provide a variety of roll lengths ranging from 100m to 400m.

You can choose from a huge range of designs, including Wood grain, Solid color, Marble, Brick and so on.

To meet your diverse needs, we provide a wide range of surface treatments, including Matt, Super matt, embossed, high gloss and soft touch.

In addition, we offer both OEM and ODM.

Applications:

Different Process for Different Applications

Membrane Press (vacuum press): This process is capable of producing varying thicknesses, ranging from 0.20 to 0.50mm in widths of 1260mm and 1400mm, and lengths of 100-300m per roll. It is suitable for covering MDF, particleboard, wooden board, fiberboard, etc., as well as embossed board and is able to cover five surfaces at the same time. Membrane Press is used for making furniture, doors and kitchen cabinetry, etc.

Wrapping Profiles: The thickness of material produced by this process range from 0.12 to 0.18mm, and the widths from 40-1260mm. It can be used to cover all types of profiles, such as wood profile, aluminum profile, PVC profile, etc., for items such as door frames, window sills, base channels, and PVC ceilings. Its maximum roll length is 800m.

Cold Laminating: This process produces material with varying thicknesses from 0.12 to 0.20mm, and widths of 1240-1260mm. It is suitable for covering all types of flat panels, such as wood panel, steel panel, aluminum panel, PVC panel, etc., primarily for doors and furniture, with a roll length of up to 500m.

Hot Laminating: The material produced by this process has thicknesses of between 0.16 and 0.30mm, with width of 1260mm, and roll lengths of 200-300m. It is suitable for covering PVC panel, steel panel, and aluminum panel in applications such as doors, skirting, and more.

Self-Adhesive: Producing material with thicknesses of between 0.10 and 0.20mm, and widths of 600mm and 1220mm, its rolls have lengths of 5-50m. This process is used for sticking any smooth surface such as furniture and indoor decorations.

Packing and Shipping:

PVC Furniture Film packaging and shipping is done in a careful and secure manner. The film is rolled onto tubes and then wrapped with foam sheet, kraft paper and plastic sheet. The rolls are then securely sealed and labeled with the product name and other relevant information. The rolls are then placed onto pallets and wrapped with shrink wrap for added protection during transit. The pallets are then loaded onto trucks and shipped to the customer's location.
