Product Description

Product Description:

Polyvinyl Chloride (PVC) is the main ingredient in Realsun Deco's PVC foil. This type of synthetic plastic is used because of its superior strength, flexibility, and easy processing. With a variety of colors, patterns, and textures, it is capable of imitating other materials such as wood, stone, cloth, metal, and can provide a premium look without the price tag.

The foil is applied to walls, doors, cabinets, furniture, and other surfaces and is suitable to a variety of interior spaces. Highly durable, it is an excellent option for high-traffic areas and doesn't need a lot of attention. A simple weekly cleaning with a wet cloth is all the maintenance required. Additionally, this foils brings a cost-effective alternative to natural materials.

Many styles and finishes are available to ensure that project requirements and individual design preferences are easily met. PVC decorative foil is widely applied to wall paneling, furniture surfaces, interior doors, retail displays, kitchen and bathroom cabinets, residential and commercial settings.

Features:

Product Name: PVC Furniture Film

Width: 1260mm, 1400mm

Length: 100-400m/roll

Material: PVC

Thickness: 0.1-0.5mm

Packing: Roll Packing, Sheet Packing

Ideal for furniture laminating, such as furniture film and pvc thermofoil film for furniture

Technical Parameters:

We provide a quality range of PVC Film. The thickness of the film ranges from 0.1mm to 0.5mm and it is available in a variety of widths, 1260mm and 1400mm being the most common. The film's length varies from 100m to 400m per roll. Our films come in a range of designs, including wood grain, solid color, marble, brick and much more. We also offer surface treatments such as Matt, Super Matt, Embossed, High Gloss and Soft Touch.

We can customize our films according to customer requirements. Thus, we offer OEM and ODM services.

Applications:

Different Process for different application:

1. Membrane Press (vacuum press): This process involves covering on MDF, particleboard, wooden board, fiberboard etc., for doors, kitchen cabinet, wardrobe, furniture with a thickness range of 0.20-0.50mm, at a width of 1260mm and 1400mm; the length of the roll is 100-300m. This process covers embossed board and is capable of covering five surfaces at the same time.
2. Wrapping Profiles: The thickness range of this process is 0.12-0.18mm, with a width of 40-1260mm and a length of 300-800m/roll. This process is used to cover all kinds of profiles including wood profile, aluminium profile, PVC profile etc., for door frame, window sill, base channel, PVC ceiling and so on.
3. Cold Laminating: The thickness range for cold laminating is 0.12-0.20mm, with a width of 1240-1260mm and length of 300-500m/roll. This process is used to cover all kinds of flat panels, such as wood panel, steel panel, aluminum panel, PVC panel etc., for doors and furniture.
4. Hot Laminating: The thickness range for hot laminating is 0.16-0.30mm, with a width of 1260mm and length of 200-300m/roll. This process is used to cover PVC panel, steel panel and aluminum panel for door, skirting etc.
5. Self-adhesive: The thickness range for this process is 0.10-0.20mm, with a width of 600mm/1220mm, and length of 5-50m/roll. It can be used to cover any smooth surface for furniture and indoor decorations.
