- Product Name: Marble PVC Film
- Thickness: 0.10mm-0.5mm
- Highlight: **Ceiling Wall PVC Film , 0.5mm PVC Film**

Product Description

Product Description:

Material

Our PVC foil is primarily made from Polyvinyl Chloride (PVC), a synthetic plastic material known for its durability, flexibility, and ease of processing.

Appearance

Our PVC foil is available in a wide range of colors, patterns, and textures. It can mimic the look of natural materials such as wood, stone, fabric, or metal, providing a cost-effective alternative to these materials while retaining a high-quality aesthetic.

Versatility

Our foil can be applied to a variety of surfaces, including doors, cabinets, furniture, walls, and more. It adheres well to different substrates and can be used in various areas of interior design.

Durability

Realsun Deco PVC foil is renowned for its resilience to deterioration and strength. Because of its durability, it is frequently used in high-traffic locations.

Maintenance

Our PVC foil requires little upkeep once it is placed. It is simple to maintain and usually just needs to be wiped down once a week with a moist cloth.

Cost-effective

The affordability of PVC decorative foil in comparison to natural materials is one of its main benefits. It makes it possible to create upscale aesthetics without incurring the related expenses.

Modification

A large range of styles and finishes are available from manufacturers, allowing for customization to meet project specifications and personal design preferences.

Application

Decorative PVC foil is commonly used in residential and commercial settings for applications such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

Technical Parameters:

PVC Film Detail Specification

The PVC Film is available in a variety of options to suit your specific needs and preferences. It is designed with the following specifications:

Thickness: ranging from 0.1mm to 0.5mm

Width: options of 1260mm, and 1400mm

Length: available in rolls of 100-500m, depending on the thickness

Design: various options, including wood grain, solid color, wallpaper, brick, marble, flower, and laser designs

Surface Treatment: options of matte finish, embossed texture, and high gloss

In addition to these standard options, we also offer services such as OEM production and customized designs and sizes to meet your specific requirements.

Applications:

The membrane press is a versatile covering for various materials such as MDF, particle board, wooden board, and fiberboard. It is commonly used for doors, kitchen cabinets, wardrobes, and furniture.

Our wrapping profiles are designed to cover a wide range of profiles, including wood, aluminum, and PVC. These profiles can be used for door frames, window sills, base channels, PVC ceilings, and more.

Cold lamination is a great option for covering flat panels like wood, steel, aluminum, and PVC. It is primarily used for doors and furniture.

For a more durable and heat-resistant option, we offer hot lamination for PVC, steel, and aluminum panels. This is ideal for covering doors, skirting, and other surfaces that require high heat resistance.

If you prefer a self-adhesive option, all of our PVC films can be transformed into self-adhesive PVC film. This uses PVC decorative film as a base material and is attached with release paper (liner) using an environmentally-friendly acrylic pressure-sensitive adhesive. It is an easy, convenient, and efficient way to decorate furniture and other surfaces.

Customization:

Marble PVC Film Customization Service

Brand Name: Realsun Deco

Place of Origin: Foshan, China

Minimum Order Quantity: 3000m/model

Price: Negotiable

Packaging Details: Pack in roll

Packing and Shipping:

Packaging and Shipping of Marble PVC Film

The Marble PVC Film is carefully packaged to ensure safe delivery and protection from damage during shipping. The packaging materials used are of high quality and are designed to withstand the rigors of transportation.

The film is first wrapped in a layer of protective foam to prevent scratches and dust from accumulating on the surface. It is then wrapped with kraft paper and plastic sheet, with additional padding and cushioning materials to prevent any movement or shifting during transit. The roll is sealed and labeled with the product name, size, and quantity for easy identification.

Our standard shipping method is through reputable courier services, with the option for expedited or express shipping for urgent orders. We also offer the flexibility for customers to arrange for their own shipping if preferred.

Upon dispatch, customers will receive a tracking number to monitor the progress of their shipment. Our team also conducts thorough quality checks before shipping to ensure that only top-quality products are delivered to our customers.

With our careful packaging and reliable shipping methods, you can be assured that your Marble PVC Film will arrive in excellent condition and ready for use.
