## Product Description

### Product Description:

Our pvc foil is primarily made from Polyvinyl Chloride (PVC), a synthetic plastic material known for its durability, flexibility, and ease of processing.

The versatility of our pvc foil is unmatched. Not only is it durable and flexible, but it also comes in a wide range of colors, patterns, and textures. It can easily mimic the look of natural materials such as wood, stone, fabric, or metal with superior quality and at a fraction of the cost.

When it comes to application, our pvc foil shines. It can be adhered to a variety of surfaces, making it perfect for doors, cabinets, furniture, walls, and more. Its ability to adhere well to different substrates also makes it a popular choice for interior use in various areas.

One of the standout features of our pvc foil is its durability. Realsun Deco PVC foil is renowned for its strength and resilience to deterioration, making it a go-to for high-traffic locations.

Aside from its impressive durability, our pvc foil also requires minimal maintenance. Once it is placed, it is simple to maintain and typically only needs to be wiped down once a week with a moist cloth.

The affordability of pvc decorative foil is one of its main draws. It is a cost-effective alternative to natural materials, allowing for upscale aesthetics without the high expenses.

For those looking for customization options, our pvc foil has got you covered. With a wide range of styles and finishes available from manufacturers, it can easily be modified to meet project specifications and personal design preferences.

No matter the application, decorative pvc foil is a popular choice in both residential and commercial settings. From kitchen and bathroom cabinets to interior doors, wall paneling, furniture surfaces, and even retail displays, its versatility and aesthetic appeal make it a top choice for a variety of uses.

### Technical Parameters:

PVC Film Detail Specification

**Thickness:** 0.1mm-0.5mm

**Width:** 1260mm, 1400mm

**Length:** 100-500m/roll (depends on the thickness)

**Design:** wood grain, solid color, wallpaper design, brick design, marble design, flower design, laser design etc.

**Surface Treatment:** matt, with embossed (texture), high gloss

**Service:** OEM, customized design and size

### Applications:

Membrane Press:

The membrane press is a versatile method for covering various materials such as MDF, particle board, wooden board, and fiberboard.

This process is commonly used for doors, kitchen cabinets, wardrobes, and other furniture applications.

Wrapping Profiles:

Our wrapping profiles can be applied to a variety of different profiles, including wood, aluminum, and PVC. These covers are commonly used for door frames, window sills, base channels, and PVC ceilings.

Cold Lamination:

We offer cold lamination services for flat panels, such as wood, steel, aluminum, and PVC panels. This method is primarily used for doors and furniture.

Hot Lamination:

Our hot lamination process is used to cover PVC, steel, and aluminum panels for applications such as doors and skirting.

Self Adhesive:

Our PVC film can also be made into self-adhesive film. This film uses PVC decorative film as the base material and is affixed with release paper using an environmentally friendly acrylic pressure sensitive adhesive. It provides a simple, convenient, and efficient way to cover furniture and other decorations.
