Product Description

Product Description:

Material:

Our PVC foil is primarily made from Polyvinyl Chloride (PVC), a synthetic plastic material known for its durability, flexibility, and ease of processing.

Appearance:

Available in a wide range of colors, patterns, and textures, our PVC foil replicates the natural look of materials like wood, stone, fabric or metal. It provides a cost-effective alternative to these materials while maintaining a high-quality aesthetic.

Versatility:

Our foil can be applied to a variety of surfaces, including doors, cabinets, furniture, walls, and more. It adheres well to different substrates, making it suitable for use in various interior areas.

Durability:

PVC foil from Realsun Deco is renowned for its resilience and strength, making it an ideal choice for high-traffic locations.

Maintenance:

Once placed, our PVC foil requires minimal upkeep and can be easily maintained by wiping it down with a moist cloth once a week.

Cost-effective:

Compared to natural materials, decorative PVC foil is highly affordable, making it possible to achieve upscale aesthetics without incurring significant expenses.

Modification:

Manufacturers offer a wide range of styles and finishes, enabling modifications to meet project specifications and personal design preferences.

Application:

Decorative PVC foil is commonly used in residential and commercial settings for various applications such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

Technical Parameters:

PVC Film Detail Specification

Thickness: 0.1mm-0.5mm

Width: 1260mm, 1400mm

Length: 100-500m/roll (depends on the thickness)

Design: Wood grain, solid color, wallpaper design, brick design, marble design, flower design, laser design, etc.

Surface Treatment: Matt, with embossed (texture), high gloss

Service: OEM, customized design and size

Applications:

Membrane Press

The cover material for membrane press can be applied on various types of boards, including MDF, particle board, wooden board, and fiberboard. This type of cover is commonly used for doors, kitchen cabinets, wardrobes, and other furniture.

Wrapping Profiles

The wrapping profiles can be used on a variety of profiles, such as wood, aluminum, and PVC. These covers are typically used for door frames, window sills, base channels, and PVC ceilings.

Cold Lamination

Cold lamination can be applied on flat panels, such as wood, steel, aluminum, and PVC. This type of cover is commonly used for doors and furniture.

Hot Lamination

Hot lamination can be applied on PVC, steel, and aluminum panels for doors, skirting, and other purposes.

Self Adhesive

All of the PVC film mentioned above can be made into self-adhesive PVC film. It uses PVC decorative film as the base material and is attached with release paper (liner) using environmentally-friendly acrylic pressure sensitive adhesive. This allows for easy and efficient application onto furniture and other decorations.

Packing and Shipping:

Marble PVC Film Packaging and Shipping

Our Marble PVC Film is carefully packaged and shipped to ensure its safe arrival to your location.

Packaging

The Marble PVC Film is first wrapped in protective foam sheet and then wrapped with kraft paper and plastic sheet.

The roll is then sealed and labeled with the product name, size, and any other necessary information.

Shipping

We offer various shipping options to accommodate your needs. Our standard shipping is via air or sea freight, depending on the quantity and destination of your order.

We also offer express shipping for urgent orders, which will be delivered within a specified timeframe.

For international orders, we handle all necessary customs and export documentation to ensure a smooth delivery process.

Once your order has been shipped, we will provide you with a tracking number so you can monitor its progress.

At Marble PVC Film, we take great care in packaging and shipping our products to ensure they arrive in perfect condition. Thank you for choosing our product.
