Product Description

Product Description:

Material:

Our PVC foil is primarily made from Polyvinyl Chloride (PVC), a synthetic plastic material known for its durability, flexibility, and ease of processing.

Appearance:

Our PVC foil is available in a wide range of colors, patterns, and textures. It can mimic the look of natural materials such as wood, stone, fabric, or metal, providing a cost-effective alternative to these materials while retaining a high-quality aesthetic.

Versatility:

Our foil can be applied to a variety of surfaces, including doors, cabinets, furniture, walls, and more. It adheres well to different substrates and can be used in various areas in interior design.

Durability:

Realsun Deco PVC foil is renowned for its resilience to deterioration and strength. Its durability makes it a popular choice for high-traffic locations.

Maintenance:

Our PVC foil requires minimal upkeep once it is installed. It is simple to maintain and usually only needs to be wiped down once a week with a damp cloth.

Cost-effective:

The affordability of PVC decorative foil compared to natural materials is one of its main benefits. It allows for upscale aesthetics without the associated expenses.

Modification:

A wide range of styles and finishes are available from manufacturers, allowing for customization to meet project specifications and personal design preferences.

Application:

Decorative PVC foil is commonly used in both residential and commercial settings for applications such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

Technical Parameters:

PVC Film: Detailed Specification

This PVC Film is available in a range of thicknesses, from 0.1mm to 0.5mm. It is also offered in a variety of widths, including 1260mm, and 1400mm. The length of each roll can vary from 100 to 500 meters, depending on the thickness chosen.

Our PVC Film comes in a variety of designs, including wood grain, solid color, wallpaper design, brick design, marble design, flower design, and laser design. These different options allow for endless possibilities in terms of applications and aesthetics.

The surface of our PVC Film can be treated in different ways, including a matte finish, an embossed texture, or a high gloss shine. This ensures versatility and provides options for different desired outcomes.

We offer various services for our PVC Film, including OEM options, customized designs and sizes, and professional suggestions for the best application of our film. This allows for personalized solutions and expert guidance for each project.

Applications:

Membrane Press:

This process uses a covering on materials such as MDF, particle board, wooden board, and fiberboard for doors, kitchen cabinets, wardrobes, furniture, and more.

Wrapping Profiles:

Our wrapping profiles can cover all types of profiles, including wood, aluminum, and PVC profiles. They are commonly used for door frames, window sills, base channels, PVC ceilings, and other applications.

Cold Lamination:

This method is used to cover flat panels, such as wood, steel, aluminum, and PVC panels, primarily for doors and furniture.

Hot Lamination:

Similar to cold lamination, this process covers PVC, steel, and aluminum panels for doors, skirting, and other items.

Self Adhesive:

All of the above mentioned PVC film can also be made into self-adhesive PVC film. This self-adhesive film uses a PVC decorative film as the base material and is affixed with release paper (liner) using environmentally friendly acrylic pressure sensitive adhesive. It can easily and securely adhere to the surface of furniture and other decorations, making it a simple, convenient, and efficient option.

Our Marble PVC Film is available in widths of 1260mm and 1400mm, with a thickness range of 0.10mm-0.5mm. The material used is high-quality PVC, providing durability and easy maintenance. Each roll comes in a length of 100-400m, making it convenient for various applications.

Choose Realsun Deco for all your customization needs. Our services include OEM and ODM, allowing you to create your own unique designs and patterns. Let us help you bring your vision to life with our high-quality Marble PVC Film, designed to elevate your interiors and leave a lasting impression.

Packing and Shipping:

Packaging and Shipping of Marble PVC Film

Our Marble PVC Film is carefully packaged to ensure its safe and secure delivery to our customers. Each roll is first wrapped in protective plastic. The roll are then stacked and secured on pallets for easy transportation.

We offer both sea and air shipping options for our customers, depending on their location and preferred delivery time. For sea shipping, our products are loaded into shipping containers and carefully secured to prevent any damage during transit. For air shipping, our products are loaded onto pallets and then onto air freight containers for quick and efficient delivery.

We also offer customized packaging options for bulk orders, including labeling and shrink wrapping with our customers' logos and branding.

With our thorough packaging process, we ensure that our Marble PVC Film arrives at its destination in perfect condition.
