Product Description

Product Description:

Material: Our PVC foil is primarily made from Polyvinyl Chloride (PVC), a synthetic plastic material known for its durability, flexibility, and ease of processing.

Appearance: Our PVC foil is available in a wide range of colors, patterns, and textures. It can mimic the look of natural materials such as wood, stone, fabric, or metal, providing a cost-effective alternative to these materials while retaining a high-quality aesthetic.

Versatility: Our foil can be applied to a variety of surfaces, including doors, cabinets, furniture, walls, and more. It adheres well to different substrates and can be used in various areas within interiors.

Durability: Realsun Deco PVC foil is renowned for its resilience and strength. Due to its durability, it is frequently used in high-traffic locations.

Maintenance: Our PVC foil requires little upkeep once it is placed. It is easy to maintain and typically only needs to be wiped down once a week with a damp cloth.

Cost-effective: The affordability of PVC decorative foil in comparison to natural materials is one of its main benefits. It allows for upscale aesthetics without incurring related expenses.

Modification: There is a wide range of styles and finishes available from manufacturers, making it possible to modify the foil to meet project specifications and personal design preferences.

Application: Decorative PVC foil is commonly used in residential and commercial settings for applications such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

Technical Parameters:

PVC Film Detail Specification

Applications:

< h1>Membrane Press:

Covering Solutions for a Variety of Materials

The membrane press process offers a durable and attractive solution for covering various types of boards, including MDF, particle board, wooden board, and fiberboard. Perfect for doors, kitchen cabinets, wardrobes, and furniture, our membrane press technology provides a seamless and long-lasting finish.

Wrapping Profiles:

Creating a Sleek Look for Any Profile

Our wrapping profiles can cover a wide range of profiles, such as wood, aluminum, and PVC. From door frames and window sills to base channels and PVC ceilings, our wrapping profiles provide a smooth and stylish finish.

Cold Lamination:

Transforming Flat Panels into Stunning Surfaces

With our cold lamination process, you can transform flat panels of wood, steel, aluminum, and PVC into sleek and modern surfaces.

Perfect for doors and furniture, our cold lamination technology delivers a high-quality and durable finish.

Hot Lamination:

Enhancing the Appearance of Various Surfaces

Our hot lamination process can cover PVC panels, steel panels, and aluminum panels, giving them a sleek and professional finish. Ideal for doors, skirting, and more, our hot lamination technology offers a cost-effective and stylish solution for any surface.

Self Adhesive:

A Convenient and Efficient Choice

Our PVC films can also be made into self-adhesive options, perfect for easy application on furniture and other decorations. Using eco-friendly acrylic adhesive, our self-adhesive PVC film offers a quick and efficient way to achieve a flawless finish on any surface.
