Matte Surface PVC Membrane Foil**

Product Description:

Material

Our pvc foil is primarily made from Polyvinyl Chloride (PVC), a synthetic plastic known for its exceptional strength, flexibility, and ease of processing.

Appearance

We offer a diverse selection of colors, patterns, and textures for our pvc foil. It is able to imitate the appearance of natural materials, such as wood, stone, cloth, and metal, while also being more cost-effective and maintaining a premium look.

Adaptability

Our foil is highly versatile and suitable for a variety of surfaces, including walls, doors, cabinets, and furniture. It can effectively be applied in various interior spaces.

Durability

Realsun Deco pvc foil is widely recognized for its durability and resistance to deterioration. This makes it a popular choice for high-traffic areas.

Maintenance

Once installed, our pvc foil requires minimal maintenance. Using a wet cloth to wipe it clean once a week is all that is needed, making upkeep easy.

Economical

A major advantage of pvc decorative foil is its lower cost compared to natural materials. It allows for the creation of sophisticated aesthetics without the hefty price tag.

Modification

Manufacturers offer a wide range of styles and finishes for pvc foil, making it possible to modify it to meet specific project requirements and individual design preferences.

Application

Decorative pvc foil is commonly used for wall paneling, furniture surfaces, retail displays, interior doors, and kitchen and bathroom cabinets, among other uses in both residential and commercial settings.

Applications:

Membrane Press:

Our membrane press technology is used to cover various materials such as MDF, particle board, wooden board, and fiberboard. This process is ideal for creating doors, kitchen cabinets, wardrobes, and furniture with a smooth and durable finish.

Wrapping Profiles:

Our wrapping profiles service covers all types of profiles, including wood, aluminum, and PVC profiles. This is perfect for enhancing the appearance and durability of door frames, window sills, base channels, PVC ceilings, and more.

Cold Lamination:

With our cold lamination process, we can cover flat panels such as wood, steel, aluminum, and PVC panels. This is ideal for adding a layer of protection and aesthetic appeal to doors and furniture.

Hot Lamination:

Our hot lamination service covers PVC, steel, and aluminum panels, providing a strong and attractive finish for doors, skirting, and other applications.

Self Adhesive:

All of our PVC films can be transformed into self-adhesive PVC film. Using an environmental acrylic pressure sensitive adhesive, the PVC decorative film is applied to furniture and other decorations with ease and efficiency. This simple and convenient method offers a perfect and durable finish.

Customization:

Customized Services for PVC Membrane Foil

Product Description:

Brand Name: Realsun Deco

Packing and Shipping:

Packaging and Shipping for PVC Membrane Foil

Our PVC membrane foil is carefully packaged to ensure its safe arrival to your doorstep. Each roll is wrapped in foam sheet and then wrapped with kraft paper and plastic sheet. For larger orders, the rolls will be stacked and secured onto a wooden pallet for added stability during shipping.

We offer flexible shipping options to accommodate your needs. You can choose from express air shipping, standard ground shipping, or sea freight. Our experienced logistics team will work with you to determine the most cost-effective and efficient shipping method for your location.

For international orders, we take extra precautions to ensure that our PVC membrane foil arrives at its destination in perfect condition. We use moisture-resistant packaging materials and comply with all customs regulations to prevent any delays or damage during transit. Rest assured, our packaging and shipping methods are designed to protect your order and ensure that you receive our high-quality PVC membrane foil in pristine condition.
