Product Description

Marble Wood Grain PVC Decorative Film Glossy Super Matt Non Toxic Moisture Proof Wrapping Roll

Product Description:

Product Specification: PVC Foil

Material Quality

The cornerstone material of our PVC foil is the versatile synthetic plastic known as Polyvinyl Chloride (PVC). Renowned for its formidable strength, adaptability, and ease of processing, PVC provides the perfect balance of properties for durable and flexible applications.

Visual Appeal

Diversity in aesthetics is key; our PVC foil comes in an expansive palette of colors, an array of patterns, and a suite of textures. Skilled at mimicking the look of natural substances such as wood, stone, fabric, or metal, our product delivers the high-end appearance of these materials at a more economical price point.

Adaptability

Engineered for versatility, our foil clings to a multitude of surfaces. Whether it's for walls, doors, cabinets, or furniture, its proficiency in application spans various items within different interior settings, supporting its reputation for wide-ranging compatibility.

Durability

Realsun Deco PVC foil is a byword for durability. It stands as a guardian against wear-and-tear, making it an ideal adornment for areas that see a high volume of activity and interaction.

Maintenance

Our PVC foil is synonymous with easy upkeep. Post-installation care involves no more than a weekly wipedown with a damp cloth, ensuring a pristine appearance with minimal effort.

Cost-Effectiveness

Economical without compromising on style, our decorative PVC foil presents a cost-effective alternative to natural materials, affording the luxury of superior design aesthetics while conserving your budget.

Customization

Reflecting individuality and project-specific needs is made easy with our broad spectrum of styles and finishes. This customization potential solidifies PVC foil as a sought-after choice for personalized design pursuits.

Applications

A stalwart in both domestic and commercial environments, our decorative PVC foil is extensively employed in fashioning wall paneling, reinventing furniture surfaces, enhancing retail displays, perfecting interior doors, and refining kitchen and bathroom cabinets, among various other applications.

MOQ: 3000m/model

Length: 100m-400m

Soft Touch PVC Foil

PVC Foil for Wardrobe

PVC Door Foil

Applications:

Application Specific Laminating Processes

1. Membrane Press (Vacuum Press)

Specifications: Thickness ranges from 0.20-0.50mm, with widths of 1260mm and 1400mm. Rolls are available in lengths between 100-300m.

Utilized for covering medium-density fibreboard (MDF), particleboard, wooden boards, and fiberboards. This process is ideal for manufacturing parts of doors, kitchen cabinets, wardrobes, and various furniture pieces. It is also suitable for covering embossed boards and can laminate five surfaces concurrently.

2. Wrapping Profiles

Specifications: Thickness spans from 0.12-0.18mm, available in widths of 40-1260mm, and rolls length range from 300-800m.

This technique is employed to laminate various profile types, including wood, aluminum, and PVC profiles. It's apt for door frames, window sills, base channels, PVC ceilings, etc.

3. Cold Laminating

Specifications: Thickness is between 0.12-0.20mm, with widths of 1240-1260mm and roll lengths of 300-500m.

Lamination using this method covers all sorts of flat panels, such as wood, steel, aluminum, and PVC panels. It is commonly used for producing doors and furniture surfaces.

4. Hot Laminating

Specifications: Thickness varies from 0.16-0.30mm, all at a width of 1260mm, with roll lengths of 200-300m.

Covers materials such as PVC panels, steel panels, and aluminum panels, and is often used for doors, skirting, and similar products.

5. Self-Adhesive Laminating

Specifications: With a thickness range of 0.10-0.20mm and available widths of 600mm and 1220mm. Roll lengths vary from 5-50m. Applicable for any smooth surface, these self-adhesive films are a quick solution for furniture and indoor decoration enhancements.
