- Supply Ability: 500000m/month

Product Specification

- Surface: Glossy/ Matt/ Embossed/ Super Matt/ Soft Touch
- Usage: Lamination, Wrapping Machine, Vacuum Membrane Press
- Thickness: 0.10mm-0.50mm
- Material: PVC
- Service: OEM, ODM
- Packing: Pack In Roll
- Design: Wood Grain, Marble, Brick, Stone And So On
- MOQ: 3000m/model
- Highlight: **Embossed Pvc Lamination Foil, Glossy Finish Pvc Lamination Foil, 0.50mm PVC Decorative Film**

Product Description

Embossed Pvc Lamination Foil Pvc Wood Grain Foil Wood Grain Design 0.10mm-0.50mm Glossy Finish

Product Description:

Wood Grain Foil Features

Material Composition

At the heart of our pvc foil lies the robust synthetic plastic known as **Polyvinyl Chloride (PVC)**. Noted for its superior strength, flexibility, and ease of processing, PVC forms the main ingredient in our durable foil products.

Visual Appeal

Our collection of pvc foil comes in an extensive palette of colors, patterns, and textures. Designed for visual mimicry, our foil can replicate the aesthetics of natural wood, stone, fabric, or metal surfaces. Despite its lower cost, it upholds a luxurious look, offering an economically sound alternative to traditional materials.

Adaptability

This versatile foil conforms to an array of surfaces, encompassing walls, doors, cabinets, and furniture. The compatibility with multiple applications makes it a go-to for varied interior design needs, enhancing spaces with its adaptive qualities.

Durability

Renowned for its durability, **Realsun Deco PVC** foil withstands wear, maintaining its quality over time, even in areas with high footfall.

This resilience translates into lasting performance in any setting.

Maintenance

Post-installation, our pvc foil needs minimal upkeep. A simple weekly wipe-down with a damp cloth suffices, ensuring that maintaining its pristine condition is both straightforward and undemanding.

Cost Efficiency

A standout benefit of our decorative pvc foil is the cost advantage it offers. Providing opulent aesthetics at a fraction of the price of natural elements, it enables the creation of refined environments without straining budgets.

Customizability

A broad spectrum of styles and finishes are available from manufacturers, allowing for bespoke modifications that cater to the specific nuances of your project and personal taste. This customization option ensures that design visions are realized with precision.

Applications

The use of decorative pvc foil spans a wide range of applications, from wall paneling and furniture facades to retail fixtures, interior portals, and storage solutions in kitchens and bathrooms. Its adaptability extends to both residential and business environments, providing functional and aesthetic enhancement across the board.

Features:

Product Name: Wood Grain Foil

MOQ: 3000m/model

Thickness: 0.10mm-0.50mm

Length: 100m-400m

Design: Wood Grain, Marble, Brick, Stone And So On

Service: OEM, ODM

Popular as pvc wood grain foil for lifelike timber aesthetics

Used as PVC membrane for furniture to enhance durability and appearance

Known for its versatility as pvc membrane foil in various decor applications

Applications:

Lamination Processes for Various Applications

Membrane Press Application :

Membrane Press, commonly referred to as vacuum press, is designed for a range of thicknesses from 0.20 to 0.50mm and comes in widths of 1260mm and 1400mm, with lengths spanning 100 to 300 meters per roll. This type of lamination is suitable for covering medium-density fiberboard (MDF), particleboard, wooden board, and fiberboard, making it perfect for manufacturing doors, kitchen cabinets, wardrobes, and other furniture items. It's also adept at covering embossed boards and can laminate five surfaces simultaneously.

Wrapping Profile Technique :

Laminates for wrapping profiles vary in thickness from 0.12 to 0.18mm, with widths ranging from 40 to 1260mm and lengths between 300 and 800 meters per roll. This technique is versatile enough to cover a variety of profiles, such as wooden, aluminum, and PVC profiles, making it ideal for door frames, window sills, base channels, PVC ceilings, and similar applications.

Cold Laminating Approach :

The Cold Laminating process involves laminates that have a thickness of 0.12 to 0.20mm, a width between 1240 and 1260mm, and lengths of 300 to 500 meters per roll. This method is particularly well-suited for flat panels including ones made of wood, steel, aluminum, and PVC. It's frequently used for doors and furniture coverings.

Hot Laminating Method :

Hot Laminating is another efficient technique, with laminates measuring 0.16 to 0.30mm in thickness, with a consistent width of 1260mm and lengths ranging from 200 to 300 meters per roll. It's primarily used for applying covers to PVC, steel, and aluminum panels that are part of doors, skirtings, and other similar elements.

Self-Adhesive Solution :

This self-adhesive laminate comes with a thickness of 0.10 to 0.20mm and is available in widths of 600mm and 1220mm, with roll lengths varying from 5 to 50 meters. The self-adhesive property allows for straightforward application to any smooth surface, offering convenience for enhancing the aesthetics of furniture and indoor decorations.

Customization:

Brand Name: Realsun Deco

Place of Origin: Foshan, China

Minimum Order Quantity: 3000m/model

Price: Negotiable
