- Length: 100-400m/roll
- Width: 1260mm/1400mm
- Highlight: **Waterproof Texture PVC Furniture Film,
Scratch Antibacterial PVC Furniture Film,
Anti Flame PVC Furniture Film**

Product Description

Product Description:

Material

The primary component of our decorative PVC foil is Polyvinyl Chloride (PVC), a synthetic plastic that is known for its outstanding strength, flexibility, and ease of processing.

Appearance

Our PVC foil comes in an array of colors, patterns, and textures. It is an affordable alternative to materials such as wood, stone, metal, and cloth, with the added bonus of being customizable to mimic their appearance while maintaining a high-end look.

Adaptability

Our decorative foil can be applied to various surfaces, including walls, doors, cabinets, and furniture. It is a versatile option that works effectively in different interior spaces.

Durability

Realsun Deco PVC foil is well-known for its strength and resistance to deterioration, making it a popular choice for high-traffic areas. It has a long lifespan, ensuring that it lasts for a long time.

Maintenance

Our PVC foil requires minimal maintenance once it is installed. It only requires a weekly cleaning with a damp cloth, which makes it easy to keep clean over time.

Economical

One of the most significant advantages of pvc decorative foil is its cost-effectiveness when compared to natural materials. It provides an opportunity to create sophisticated aesthetics without their associated costs.

Modification

There are many varieties of styles and finishes available from manufacturers, making it possible to modify the pvc decorative foil to meet project requirements and individual design preferences.

Application

Decorative PVC foil is commonly used for wall paneling, furniture surfaces, retail displays, interior doors, kitchen and bathroom cabinets, and other uses in both home and commercial settings.

Features:

Technical Parameters:

Our product is available in a range of thickness from 0.1mm to 0.5mm. We offer our material in two different width sizes, 1260mm and 1400mm.

The length of our product roll ranges from 100m to 400m. We provide various designs such as wood grain, solid color, marble, brick, and more, for our customers to choose from.

Our material is treated with a range of surface treatments. You can choose from matt, super matt, embossed, high gloss, and soft touch options.

We also offer OEM and ODM services to our customers. Our helpful team will assist you in your custom orders to provide the perfect solution for your needs.

Applications:

Different Process for Different Application:

There are different processes available for different applications. Here are five of them:

1. Membrane Press (Vacuum Press)

This process involves covering MDF, particleboard, wooden board, fiberboard, and other materials with a thickness of 0.20-0.50mm using a vacuum press. The width can be either 1260mm or 1400mm, with a length of 100-300m per roll. It's ideal for doors, kitchen cabinets, wardrobes, furniture, and can cover embossed boards and five surfaces simultaneously.

2. Wrapping Profiles

The wrapping profiles process is suitable for wood profile, aluminum profile, PVC profile, and other types of profiles, which can be covered with a thickness of 0.12-0.18mm. The width ranges from 40-1260mm and can be 300-800m per roll. This process is suitable for door frames, window sills, base channels, PVC ceilings, and more.

3. Cold Laminating

If your project requires covering flat panels such as wood panel, steel panel, aluminum panel, and PVC panel, the cold laminating process is your best bet. You can cover them with a thickness of 0.12-0.20mm with a width of 1240-1260mm and a length of 300-500m per roll. This process is ideal for doors and furniture.

4. Hot Laminating

The hot laminating process is suitable for covering materials such as PVC panel, steel panel, and aluminum panel. It has a thickness range of 0.16-0.30mm with a width of 1260mm and a length of 200-300m per roll. This process is ideal for doors, skirting, and more.

5. Self-adhesive

Self-adhesive film is perfect for furniture and indoor decoration. The thickness range is 0.10-0.20mm with a width of either 600mm or 1220mm. The length of this film can vary from 5-50m per roll, and it can be easily put on any smooth surface.

Customization:

Support and Services:

Our Product Technical Support and Services for PVC Furniture Film include:

- Assistance with product selection and recommendation based on specific needs and requirements
- Technical consultation on product installation and maintenance
- Troubleshooting and problem-solving support
- Product training and educational resources
- Warranty and guarantee information
