- Length: 100-400m/roll
- Packing: Roll Packing, Sheet Packing
- Surface: Glossy, Matte, Embossed, Super Matte, Soft Touchetc.
- Material: PVC
- Highlight: **0.1mm PVC Furniture Film,**
0.5mm PVC Furniture Film,
Durable PVC Furniture Film

Product Description

Product Description:

Information About PVC Foil

Material

The primary ingredient of our PVC foil is Polyvinyl Chloride (PVC), a synthetic plastic. PVC is known for its excellent strength, flexibility, and processing simplicity. This makes our PVC foil a great choice for interior design.

Appearance

We provide a variety of colors, patterns, and textures for our PVC foil. It's a great alternative to using real materials such as wood, stone, cloth, or metal, as it can mimic their appearance at a more affordable price point while still maintaining a premium look.

Adaptability

Our foil is suitable for a wide range of interior surfaces, such as walls, doors, cabinets, and furniture. It's versatile and can be applied to different surfaces.

Durability

Realsun Deco PVC foil has a reputation for being durable due to its strength and resistance to deterioration. It's an excellent choice for high-traffic areas that see heavy use.

Maintenance

After installation, our PVC foil only requires minimal attention. It only needs to be cleaned once a week with a wet cloth, which makes maintenance a breeze.

Economical

One of the primary advantages of PVC decorative foil is its cost-effectiveness compared to natural materials. It allows for a sophisticated aesthetic without the associated costs.

Modification

Manufacturers offer a wide variety of styles and finishes, meaning it's easy to modify PVC foil to meet individual preferences and project requirements.

Application

PVC decorative foil is used in various applications in both home and commercial settings, including wall paneling, furniture surfaces, retail displays, interior doors, and kitchen and bathroom cabinets.

Features:

Product Name: PVC Furniture Film

Packing: Roll Packing, Sheet Packing

Payment Term: T/T, L/C, Etc.

Application: Furniture, Door, Cabinet, Wall, Profile, Ceiling Etc.

Width: 1260mm/1400mm

Material: PVC

This furniture vinyl film is perfect for use on furniture, doors, cabinets, walls, profiles, ceilings, and more. Available in roll or sheet packing, with a width of either 1260mm or 1400mm. Payment terms include T/T, L/C, and more. Made with durable PVC material, this thermofoil film for furniture is a great choice for your next project.

Technical Parameters:

The available range for thickness are between 0.1mm to 0.5mm. Meanwhile, the standard widths available are 1260mm and 1400mm. The length of each roll may vary but typically range between 100m to 400m.

We offer an extensive assortment of designs to cater to our customer's preferences. Our designs include wood grain, solid colors, marble, brick and many more.

We adhere to high quality standards in surface treatment. Our surface treatments include matt, super matt, embossed, high gloss and soft touch.

We have customizable options for our customers according to their needs. Our services include both OEM and ODM support.

Applications:

Different Processes for Different Applications:

When it comes to covering different types of materials for various applications, there is no one-size-fits-all solution. In this article, we will look at five different processes tailored for different needs.

1. Membrane Press (Vacuum Press)

If you're looking to cover materials that require a thickness between 0.20-0.50mm, then the membrane press (vacuum press) is the ideal solution. With a width of 1260mm or 1400mm and a length of 100-300m per roll, this will cover a wide range of materials, including MDF, particleboard, wooden board, and fiberboard. You can use it to cover embossed board and even cover five surfaces at the same time. Ideal for doors, kitchen cabinets, wardrobes, furniture, and other applications.

2. Wrapping Profiles

If you need to cover all kinds of profiles, including wood profile, aluminum profile, and PVC profile, then you should consider using wrapping profiles. With a thickness of 0.12-0.18mm and a width of 40-1260mm, you can easily cover the profiles length of 300-800m per roll. It's perfect for covering door frames, window sills, base channels, PVC ceilings, and more.

3. Cold Laminating

If you need to cover flat panels such as wood panel, steel panel, aluminum panel, or PVC panel, cold laminating is a great option. With a thickness of 0.12-0.20mm and a width of 1240-1260mm, it can cover a length of 300-500m per roll. Ideal for doors and furniture.

4. Hot Laminating

If you need to cover PVC panel, steel panel, or aluminum panel, for applications such as doors and skirting, then hot laminating is the way to go. The thickness of the material ranges between 0.16-0.30mm, with a width of 1260mm and a length of 200-300m per roll.

5. Self-Adhesive

Self-adhesive materials are incredibly versatile and can be used on any smooth surface for furniture and indoor decorations. The thickness of the material ranges from 0.10-0.20mm, with a width of 600mm or 1220mm and a length of 5-50m per roll.

Customization:

Our PVC film for furniture is highly durable and can be customized as per your requirements. We offer themofoil film for furniture with roll and sheet packing options. Our packaging details include packing in rolls. The delivery time for our product is 20-25 days and the price is negotiable.
