Product Description:

Our pvc foil is manufactured using Polyvinyl Chloride (PVC), a synthetic plastic that is strong, flexible, and easy to process. It is the primary material used in the production of our PVC foil.

We offer a broad range of colors, patterns, and textures for our pvc foil. It can replicate the look of natural materials, such as stone, metal, cloth, and wood, while being more affordable and retaining a premium appearance.

Our foil is highly adaptable and can be used for different surfaces, including furniture, cabinets, doors, and walls. It performs well on many surfaces and is ideal for a variety of interior spaces.

Realsun Deco PVC foil is known for durability and strength. It has good resistance to deterioration and, as a result, is frequently used in high-traffic areas.

Caring for our pvc foil after installation is easy. Regular cleaning with a wet cloth is all that is required, meaning that maintenance is minimal.

Decorative PVC foil is cost-effective compared to natural materials. It allows for the creation of sophisticated aesthetics without the associated costs.

The broad range of styles and finishes offered by manufacturers makes it possible to modify to meet project requirements and personal design preferences.

Decorative pvc foil is a popular choice for wall paneling, furniture surfaces, retail displays, interior doors, kitchen and bathroom cabinets, and other uses in both home and commercial settings.
