Product Description

Product Description:

Material

Our pvc foil is made of Polyvinyl Chloride (PVC), which is a synthetic plastic known for its strength, flexibility, and easy processing. It is the primary ingredient in our material, allowing us to create a product that is both durable and adaptable.

Appearance

We offer a diverse selection of colors, patterns, and textures for our pvc foil. It emulates the appearance of natural materials like wood, stone, cloth, or metal. However, it is more affordable and maintains a premium look. Our product provides a cost-effective alternative to traditional materials when creating sophisticated aesthetics.

Adaptability

Our pvc foil is suitable for a wide range of surfaces, including walls, doors, cabinets, and furniture. It is highly effective on many surfaces and can be applied in various interior spaces, making it a versatile solution for interior design projects.

Durability

Our Realsun Deco PVC foil is known for its strength and resistance to deterioration. Its longevity makes it a popular choice for high-traffic areas, as it can withstand wear and tear without losing its visual appeal.

Maintenance

After installation, our pvc foil requires very little maintenance. A simple weekly cleaning with a wet cloth is all that is necessary to keep it looking great, making maintenance a breeze.

Economical

One of the primary advantages of pvc decorative foil is its affordability compared to natural materials. It allows for sophisticated aesthetics to be created without incurring the associated costs of using traditional materials.

Modification

Manufacturers offer a vast selection of styles and finishes, making it easy to modify pvc foil to meet different project requirements and individual design preferences. It is a versatile option for adding a decorative touch to any interior space.

Application

Decorative pvc foil is commonly used for a variety of interior design projects, including wall paneling, furniture surfaces, retail displays, interior doors, kitchen and bathroom cabinets, and other applications in both home and commercial settings. Its versatility and affordability make it a popular choice for designers and homeowners alike.

Features:

Product Name: PVC Furniture Film

Feature: Waterproof, Anti Flame, Anti Scratch, Antibacterial, Etc.

Surface: Glossy, Matte, Embossed, Super Matte, Soft Touch, etc.

Length: 100-400m/roll

Width: 1260mm/1400mm

Thickness: 0.1mm-0.5mm

This furniture decorative foil, also known as pvc thermofoil film for furniture or furniture vinyl film, is perfect for adding a stylish and durable finish to your furniture.

Technical Parameters:

The thickness of our product ranges from 0.1mm to 0.5mm, providing you with a variety of options to choose from. Whether you need a thicker or thinner film, we have got you covered.

Our width options include 1260mm and 1400mm, giving you the flexibility to select the perfect size for your needs. With our range of sizes, you can be sure to find a product that suits your project requirements.

Our rolls come in a convenient length of 100-400m, making them perfect for large-scale projects. You can have peace of mind knowing that you won't have to constantly replace the roll during your project.

We offer various designs to choose from, including wood grain, solid colors, marble, brick, and more. With a range of options, you can select a design that complements your project and enhances its overall look.

The surface treatment options we provide include matt, super matt, embossed, high gloss, and soft touch. Our treatments not only add an aesthetic appeal to your project but also provide extra protection and durability.

We understand that every project is unique, which is why we offer OEM and ODM services. Our team of experts can work closely with you to customize our product according to your specific requirements. You can rely on our skills and experience to deliver a tailored solution that meets your expectations.

Overall, our products have a range of options to choose from, providing you with the flexibility to select a product that complements your project best.

Applications:

Different Processes for Different Applications

When it comes to covering various surfaces, there are different processes available for different applications:

1. Membrane Press (Vacuum Press)

The membrane press involves using a vacuum to press a cover onto various surfaces such as MDF, particleboard, wooden board,

fiberboard, etc. This process is suitable for covering doors, kitchen cabinets, wardrobes, furniture, and more. The thickness of the cover ranges from 0.20-0.50mm, the width is 1260mm or 1400mm, and the length is 100-300m/roll. This process also allows for embossing and covering five surfaces at the same time.

2. Wrapping Profiles

Wrapping profiles is the process of covering all kinds of profiles including wood profile, aluminum profile, PVC profile, etc. The cover is used for door frames, window sills, base channels, PVC ceilings, and more. The thickness of the cover is 0.12-0.18mm, the width is 40-1260mm, and the length is 300-800m/roll.

3. Cold Laminating

Cold laminating is the process of covering all kinds of flat panels such as wood panel, steel panel, aluminum panel, PVC panel, etc. The cover is used for doors and furniture. The thickness of the cover is 0.12-0.20mm, the width is 1240-1260mm, and the length is 300-500m/roll.

4. Hot Laminating

Hot laminating involves covering PVC panels, steel panels, aluminum panels, and other surfaces for doors, skirting, and more. The thickness of the cover is 0.16-0.30mm, the width is 1260mm, and the length is 200-300m/roll.

5. Self-Adhesive

Self-adhesive covers are the simplest to apply, allowing for application on any smooth surface for furniture and indoor decorations. The thickness ranges from 0.10-0.20mm, the width is 600mm or 1220mm, and the length is 5-50m/roll.
