- Design: Wood Grain, Marble, Brick, Stone, Plain Color Etc.
- Surface: Glossy, Matte, Embossed, Super Matte, Soft Touch
- Length: 100m-400m/roll
- Usage: Lamination, Vacuum Membrane Press, Wrapping, Hot Press And So On
- Material: PVC
- Thickness: 0.1mm-0.5mm
- Width: 1260mm, 1400mm
- Service: OEM, Customized Design And Size
- Highlight: **Embossed Wood Grain PVC Lamination Film ,
Vacuum Press PVC Lamination Film ,
1260-1400mm PVC Lamination Film**

Product Description

Product Description:

The primary ingredient in our pvc foil is Polyvinyl Chloride (PVC). Being a synthetic plastic, PVC has excellent strength, flexibility, and is simple to process. The material offers excellent properties for use as a decorative foil.

Our pvc foil provides a variety of colors, patterns, and textures. It can even imitate materials such as wood, stone, cloth, or metal but remains more affordable. The foil maintains a premium appearance throughout its use.

The decorative foil is adaptable to a wide range of surfaces such as walls, doors, cabinets, and furniture. Its effective use spans various interior spaces, making it versatile.

Our Realsun Deco PVC foil is known for its strength and resistance to deterioration, making it durable enough to handle high-traffic areas. It is a popular choice for those who are looking for long-lasting decorative material options.

Maintenance of our pvc foil is simple. After installation, it needs to be cleaned once a week with a wet cloth. This low level of maintenance makes this foil a more convenient choice.

PVC decorative foils are widely recognized for their cost-effectiveness as they are lower in cost compared to natural materials. They allow for sophisticated aesthetics without incurring associated costs.

Manufacturers of these foils offer a wide variety of styles and finishes, making it possible to modify to satisfy project requirements and individual design preferences.

The application of decorative pvc foil is widespread. It is often used for wall paneling, furniture surfaces, retail displays, interior doors, kitchen and bathroom cabinets, and other uses in both home and commercial settings.

Features:

Product Name: PVC Lamination Film

Thickness: 0.1mm-0.5mm

Width: 1260mm, 1400mm

Length: 100m-400m/roll

Design: Wood Grain, Marble, Brick, Stone, Plain Color Etc.

Material: PVC

Introducing our PVC Lamination Film, available in a variety of designs including Wood Grain, Marble, Brick, Stone, Plain Color Etc. This lamination vinyl film is made of durable PVC material and comes in thicknesses between 0.1mm-0.5mm. Choose from widths of 1260mm or 1400mm and lengths of 100m-400m per roll. Perfect for adding a stylish and protective layer to your surfaces.

Upgrade your surfaces with our wood grain PVC lamination film, perfect for adding a touch of nature to your space. The durable PVC material ensures long-lasting protection and the wood grain design adds a touch of elegance to any surface.

Technical Parameters:

Product Information

The available thickness of our products range from 0.1mm to 0.5mm, presenting a wide variety of options for our customers. We offer two widths of 1260mm and 1400mm, making it easier for you to choose the best fit for your requirements.

The rolls come in lengths of 100 to 400m, providing you with ample material to work with. Our products come in a range of design options, including wood grain, solid colors, marble, brick, and many more.

We also offer different surface treatments to meet your desired specifications. We have a matte finish, a super matte finish, an embossed finish, a high gloss finish, and a soft-touch finish, all of which provides different textures and appeal to your applications.

In addition to our extensive product offerings, we also provide excellent service. We are capable of providing OEM and ODM services, ensuring that your products are tailored to your unique requirements. These services allow you to maintain control over the production of your materials and ensure their quality for your customers.

Applications:

Different Processes for Different Applications

When it comes to covering various surfaces for doors, furniture, indoor decorations, and more, different processes are required depending on the specific application. Below are five processes commonly used for PVC film:

1. Membrane Press (Vacuum Press)

Thickness: 0.20-0.50mm

Width: 1260mm, 1400mm

Length: 100-300m/roll

This process involves covering MDF, particleboard, wooden board, fiberboard, and other surfaces. It is commonly used for doors, kitchen cabinets, wardrobes, furniture, and similar applications. The process can also emboss the board and cover five surfaces at the same time.

2. Wrapping Profiles

Thickness: 0.12-0.18mm

Width: 40-1260mm

Length: 300-800m/roll

Wrapping profiles is another process commonly used to cover various profiles, including wood profile, aluminum profile, PVC profile, and more. This process is ideal for covering door frames, window sills, base channels, PVC ceilings, and other similar applications.

3. Cold Laminating

Thickness: 0.12-0.20mm

Width: 1240-1260mm

Length: 300-500m/roll

Cold laminating is suitable for covering flat panels such as wood panel, steel panel, aluminum panel, and PVC panel. This process is

commonly used for doors and furniture.

4. Hot Laminating

Thickness: 0.16-0.30mm

Width: 1260mm

Length: 200-300m/roll

Hot laminating is specifically used for covering PVC panel, steel panel, and aluminum panel for doors, skirting boards, and other similar applications.

5. Self-Adhesive

Thickness: 0.10-0.20mm

Width: 600mm/1220mm

Length: 5-50m/roll

The self-adhesive process is versatile as the PVC film can be put on any smooth surface. It's an excellent choice for furniture and indoor decorations.

Before shipping by sea or air, we pack the PVC film in roll with wrapping foam sheet, kraft paper, and plastic sheet. We can also offer pallet packing for your convenience.

The PVC film comes with foam protection sheet, kraft paper head, and plastic sheet outside to ensure its safe delivery.

Customization:

Place of Origin: Foshan, China

Minimum Order Quantity: 3000m/model

Price: Negotiable

Packaging Details: Pack in roll

Delivery Time: 15-20 days
